Computational Modeling and Simulation of Advanced Wireless Communication Systems Agbotiname Lucky Imoize, Weibert Montlouis, Mohammad S. Obaidat, Segun I. Popoola, Mohammad Hammoudeh, 2024-11-29 The book covers the exploitation of computational models for effectively developing and managing large scale wireless communication systems. The goal is to create and establish computational models for seamless human interaction and efficient decision making in beyond 5G wireless systems. *Computational Modeling and Simulation of Advanced Wireless Communication Systems* looks to create and establish computational models for seamless human interaction and efficient decision making in the beyond 5G wireless systems. This book presents the design and development of several computational modeling techniques and their applications in wireless communication systems. It examines shortcomings and limitations of the existing computational models and offers solutions to revamp the traditional architecture toward addressing the vast network issues in wireless systems. The book addresses the need to design efficient computational and simulation models to address several issues in wireless communication systems such as interference, path loss, delay, traffic outage, and so forth. It discusses how theoretical, mathematical, and experimental results are integrated for optimal system performance to enhance the quality of service for mobile subscribers. Further, the book is intended for industry and academic researchers, scientists, and engineers in the fields of wireless communications and ICTs. It is structured to present a practical guide to wireless communication engineers, IT practitioners, researchers, students, and other professionals. *Handbook of Communications Security* F.
