Agriculture Handbook, 2017 **Map Librarianship** Susan Elizabeth Ward Aber, Jeremy Aber, 2016-11-04 Map Librarianship identifies basic geoliteracy concepts and enhances reference and instruction skills by providing details on finding downloading delivering and assessing maps remotely sensed imagery and other geospatial resources and services primarily from trusted government sources By offering descriptions of traditional maps geographic information systems GIS remote sensing and other geospatial technologies the book provides a timely and practical guide for the map and geospatial librarian to blend confidence in traditional library skill sets Includes rarely discussed concepts of citing and referencing maps and geospatial data fair use and copyright Creates an awareness and appreciation of existing print map collections while building digital stewardship with surrogate map and aerial imagery collections Provides an introduction to the theory and applications of GIS remote sensing participatory neogeography and neocartography practices and other geospatial technologies Includes a list of geospatial resources with descriptions and illustrations of commonly used map types and formats online geospatial data sources and an introduction to the most commonly used geospatial software packages available on both desktop and mobile platforms *Water Management and Water Governance* Ashish Pandey, S.K. Mishra, M.L. Kansal, R.D. Singh, V.P. Singh, 2020-11-11 This book focusses on hydrological modeling water management and water governance It covers the applications of remote sensing and GIS tools and techniques for land use and land cover classifications estimation of precipitation evaluation of morphological changes and monitoring of soil moisture variability Moreover remote sensing and GIS techniques have been applied for crop mapping to assess cropping patterns computation of reference crop evapotranspiration and crop coefficient Hydrological modeling studies have been carried out to address various issues in the water sector MODFLOW model was successfully applied for groundwater modeling and groundwater recharge estimation Runoff modeling has been carried out to simulate the snowmelt runoff together with the rainfall and sub surface flow contributions for snow fed basins A study has been included which predicts the impact of the land use and land cover on stream flow Various problems in the water sector have been addressed employing hydrological models such as SWAT ArcSWAT and VIC An experimental study has been presented wherein the laboratory performance of rainfall simulator has been evaluated Hydrological modeling studies involving modifications in the curve number methodology for simulation of floods and sediment load have also been presented This book is useful for academicians water practitioners scientists water managers environmentalists and administrators NGOs researchers and students who are involved in water management with the focus on hydrological modeling water management and water governance *A Research Guide to Cartographic Resources* Eva H. Dodsworth, 2018-09-22 The interdisciplinary uses of traditional cartographic resources and modern GIS tools allow for the analysis and discovery of information across a wide spectrum of fields A Research Guide to Cartographic Resources navigates the numerous American and Canadian cartographic resources available in print and online offering

researchers academics and students with information on how to locate and access the large variety of resources new and old Dozens of different cartographic materials are highlighted and summarized along with lists of map libraries and geospatial centers and related professional associations A Research Guide to Cartographic Resources consists of 18 chapters two appendices and a detailed index that includes place names and libraries structured in a manner consistent with most reference guides including cartographic categories such as atlases dictionaries gazetteers handbooks maps plans GIS data and other related material Almost all of the resources listed in this guide are categorized by geography down to the county level making efficient work of the type of material required to meet the information needs of those interested in researching place specific cartographic related resources Additionally this guide will help those interested in not only developing a comprehensive collection in these subject areas but get an understanding of what materials are being collected and housed in specific map libraries geospatial centers and their related websites Of particular value are the sections that offer directories of cartographic and GIS libraries as well as comprehensive lists of geospatial datasets down to the county level This volume combines the traditional and historical collections of cartography with the modern applications of GIS based maps and geospatial datasets
