Giberson, 2016-04-18 Most of us believe everything happens for a reason Whether it is God's will karma or fate we want to believe that nothing in the world especially disasters and tragedies is a random meaningless event But now as never before confident scientific assertions that the world embodies a profound contingency are challenging theological claims that God acts providentially in the world The random and meandering path of evolution is widely used as an argument that God did not create life Abraham's Dice explores the interplay between chance and providence in the monotheistic religious traditions looking at how their interaction has been conceptualized as our understanding of the workings of nature has changed This lively historical conversation has generated intense ongoing theological debates and provocative responses from science what are we to make of the history of our universe where chance and law have played out in complex ways Or the evolution of life where random mutations have challenged attempts to find purpose within evolution and convinced many

that human beings are but a glorious accident The enduring belief that everything happens for a reason is examined through a conversation with major scholars among them holders of prestigious chairs at Oxford and Cambridge Universities and the University of Basel as well as several Gifford lecturers and two Templeton prize winners Organized historically Abraham s Dice provides a wide ranging scientific theological and biblical foundation to address the question of providence and divine action in a world shot through with contingency El-Hi Textbooks and Serials in Print, 1995 R R Bowker

On Earth and Beyond* Andreas Losch,2017-07-13 Approaches from the sciences philosophy and theology including the emerging field of astrobiology can provide fresh perspectives to the age old question what is life Has the secret of life been unveiled and is it nothing more than physical chemistry Modern philosophers will ask if we can even define life at all as we still don t know much about its origins here on Earth Others regard life as something that cannot simply be reduced to just physics and chemistry while biologists emphasize the historical component intrinsic to life on Earth How can theology constructively interpret scientific findings Can it contribute constructively to scientific discussions Written for a broad interdisciplinary audience this probing volume discusses life intelligence and more against the background of contemporary biology and the wider contexts of astrobiology and cosmology It also considers the challenging implications for science and theology if extraterrestrial life is discovered in the future Science Books & Films ,1982
