reasons early adopters of Linux chose it over say Windows NT was the powerful command line interface which made the difficult tasks possible

**Linux** Erickson Karnel, 2022-08-25 Do you want to understand better the purpose of Linux and why do so many people prefer it over Windows If yes then keep reading Linux at the core is known as one of the best known and most utilized open source operating systems Essentially it sits underneath your other software on the computer to take these requests and relay them to the hardware on the computer Effectively all of the programs services and tools are put into this to create a super functional operating system But the thing about Linux is that it is everywhere It has been around since the 90s and it has got a super popular user base that spans all over different industries and continents So the truth is you are probably using Linux right now it's in the phones fridges and even in Roku devices and most of the internet uses this You may wonder why some people choose Linux over windows well there are a few reasons For starters Linux can be used on older computers While you can use Windows XP on some it is not supported by security updates like the later versions Many Linux distributions are reused specifically for older hardware and are updated on a regular basis Then there is also the fact that some of these distributions and environments are more familiar to those who like traditional computers than those that are using Windows 10 there are lots of complaints about Windows 10 and while the bugs may have been taken out people still prefer Linux over this This book covers Virtual Machine How secure your
