The New Grey (Technologies of Mass Disruption) Jason Savitt,2020-10-15 As technology advances we have to look beyond the finite thinking of a task will it be a human or a machine s responsibility We need to look at how we can use Artificial Intelligence A I to enhance the task so that it can be performed better faster at a lower cost and a higher quality without destroying the human contribution in the process This is where New Grey thinking comes into play it s when things are not black or white and they are grey The New Grey is a hybrid thinking on how to utilize the best features of A I while partnering it with the best aspects of human intellect There are already millions and there will be eventually billions of devices like smartphones smart speakers Internet of Things and other gadgets creating larger amounts of data at an exponential rate Existing and next generation Big Data technologies will struggle to capture store query analyze search and visualize all this information A I can be a game changer for businesses trying to process all this data or for whole new product categories Although It s not a magical buzzword that can be added to any product and will automatically improve it Although A I can make a product or service smarter when implemented correctly A I can also give organizations the ability to find trends in data that a human might not be able to see Although in the end we must never forget that it is the humans that are the consumers or benefactors of this information The whole purpose of this book is to explore the roles that humans and machines will play together over the coming years and decades Machines will be evolved by their creators to do more advanced operations in the near future The question is will we be ready for what it holds for us In the final chapter of this book it shows how to set up a quick demo using one of the most advanced Machine Learning algorithm i e GPT 2 that is publicly available to utilize or
