Financial Tutorial: First Aid Solutions To Money Problems Davidson C. Okoko & Chidozie C. Okoko, 2011-08-25 Is trading stocks bonds commodities real estate a form of investing Precisely is trading a security a form of investing This book strives to let you answer this question Not only that it actually takes you through the rudimentary processes of trading them It attempts to resolve the ambiguities surrounding trading and investing which discourages people from engaging in the act It uses practical examples to show you how the money market and the capital markets can work to your advantage The term day trading is seen as precarious But is it really What if there were terms like week trading month trading or even year trading or more so decade trading Then seemingly precarious nature of trading will be removed As a result the definitions of trading and investing begin to converge Investing is the act of committing resources especially money to a venture to generate profits The time element of investing

can be as short as nano seconds or as long as centuries or millennia. Going by this the infinitesimal timeline in trading securities should not make that venture any less than investing. So trading as this book considers transcends daily or hourly momentum; it also delves into far longer periods, decades and centuries. Whenever an investment product is bought and sold, it had been essentially traded irrespective of the time lapse.

Translation Theory and Development Studies Kobus Marais, 2014-07-16

This book aims to provide a philosophical underpinning to translation and relate translation to development. The second aim flows from the first section's argument that societies emerge out of, amongst others, complex translational interactions amongst individuals. It will do so by conceptualising translation from a complexity and emergence point of view and relating this view on emergent semiotics to some of the most recent social research. It will further fulfill its aims by providing empirical data from the South African context concerning the relationship between translation and development. The book intends to be

interdisciplinary in nature and to foster interdisciplinary research and dialogue by relating the newest trends in translation theory i e agency theory in the sociology of translation to development theory within sociology Data in the volume will be drawn from fields that have received very little if any attention in translation studies i e local economic development the knowledge economy and the informal economy
