### **Literature Essay For Paper 3 2014:**

#### **Sustainability · Strategy · Space - exploring influences on governing for urban sustainability in municipalities**

Paul Fenton, 2016-06-21 The pursuit of urban sustainability is considered central to sustainable development and is a key objective of the global Sustainable Development Goals 2015 and the New Urban Agenda 2016. This thesis aims to contribute to debates on urban sustainability by providing insights as to the role of actors participating in processes of governing for urban sustainability with particular focus on the municipal organisation. The thesis employs an interdisciplinary approach to illustrate divergent approaches to governing for urban sustainability with reference to empirical studies of strategic planning processes in municipalities in selected North western European countries: Sweden, Switzerland and The Netherlands. These studies address themes including climate change, sustainable transport and multi level governance. The thesis provides a broad overview of theoretical discussions related to governing strategy and planning, the role of actors in governing for urban sustainability and the particular importance of climate change as a challenge for urban sustainability. A number of research gaps are identified and addressed in two research questions focusing on the organisation and practice of processes of governing for urban sustainability and the factors influencing actors participating in such processes. The thesis responds to these research questions with reference to five appended papers which illustrate different dimensions of governing for urban sustainability. The first paper concerns the organisation of processes to develop energy and climate strategies in Swedish municipalities and the second paper highlights the experiences of actors participating in such processes. The third paper presents results from a survey illustrating the expectations of stakeholders active in governing transport in the city of Norrköping, Sweden. In the fourth paper, the development and implementation of policies aiming for sustainable transport and urban sustainability in Basel, Switzerland, are discussed. In the final paper, cooperation through transnational municipal networks is explored with reference to the World Ports Climate Declaration, an initiative of the city of Rotterdam. The thesis confirms the presence of five factors: capacity, mandate, resources, scope and will, that shape the strategy space of actors and play an important role in conditioning the form and content of processes of governing for urban sustainability. The thesis suggests that the ways in which a municipal organisation perceives and mobilises the five factors will strongly determine the extent of its sustainability strategy space. In sum, municipal organisations and other actors participating in processes of governing for urban sustainability need to mobilise the five factors and expand their strategy space in order to achieve vertical and horizontal alignment of strategic objectives and facilitate implementation that delivers transformative change.

The rise of Creative Writing has been accompanied from the start by two questions can it be taught and should it be taught This scepticism is sometimes shared even by those who teach it who often find themselves split between two contradictory

identities the artistic and the academic Against Creative Writing explores the difference between writing which is what writers do and Creative Writing which is the instrumentalisation of what writers do Beginning with the question of whether writing can or ought to be taught it looks in turn at the justifications for BA MA and PhD courses and concludes with the divided role of the writer who teaches It argues in favour of Creative Writing as a form of hands on literary education at undergraduate level and a form of literary apprenticeship at graduate level especially in widening access to new voices It argues against those forms of Creative Writing that lose sight of literary values as seen in the proliferation of curricular couplings with non literary subjects or the increasing emphasis on developing skills for future employment Against Creative Writing written by a writer is addressed to other writers inside or outside the academy at undergraduate or graduate level whether creative or critical      The MDGs, Capabilities and Human Rights Sakiko Fukuda-Parr,Alicia Yamin,2017-10-02
