

MARK SCHEME for the May/June 2013 series

1123 ENGLISH LANGUAGE

1123/21

Paper 2 (Reading), maximum raw mark 50

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

outside their natural distribution range causing serious environmental problems at great cost Cerambycid pests of field vine and tree crops and of forest and urban trees cost billions of dollars in production losses damage to landscapes and management expenditures worldwide Cerambycidae of the World Biology and Pest Management is the first comprehensive text dealing with all aspects of cerambycid beetles in a global context It presents our current knowledge on the biology classification ecology plant disease transmission and biological cultural and chemical control tactics including biosecurity measures from across the world Written by a team of global experts this book provides an entrance to the scientific literature on Cerambycidae for scientists in research institutions primary industries and universities and will serve as an essential reference for agricultural and quarantine professionals in governmental departments throughout the world Beyond regulatory compliance – Seafood traceability benefits and success cases Food and Agriculture Organization of the United Nations ,2020-06-01 Since the mid 1990s traceability has become a popular concept in industrial logistics regardless of the production regime and type of product Implementing traceability systems across the food supply chain is seen as crucial for increasing food quality and safety for optimizing production or for documenting sustainability However implementation of traceability systems in the seafood sector seems to be stagnating Against this backdrop the main objective of this study is to define and analyse in detail seafood traceability benefits related to regulatory compliance supply chain management improvements market access facilitation and risk mitigation To support this objective the study collects and compiles policy incentives from governments and industry associations to encourage the establishment of company seafood traceability In addition this study updates information regarding existing traceability standards and norms serving various purposes in the seafood sector Based on a thorough analysis of speciality literature and the extensive experience of the authors this study formulates several recommendations that are relevant for a wide range of stakeholders in the seafood sector

Confronting Hunger in the USA Adam M. Pine,2016-07-01 Food insecurity in the US is a critical issue that is experienced by approximately 15% of the population each year Hunger is not caused by an inability to produce enough food for the population but is instead a manifestation of federal agricultural policies that support the overproduction of commodity crops and neoliberal social policies that seek to lower the amount of benefits dispersed to those in need This book focuses on how four different food based community programs address both the physical sensation of hunger as well as the political and economic disempowerment that work against the ability of people experiencing food insecurity to mobilize as a political force Confronting Hunger in the USA argues that most food programs do more to create community among their volunteers than among program participants and tend to reinforce neoliberal understandings of citizenship Community food programs reach out to the most vulnerable members of society in caring and gentle ways and often use the language of alternative economies to articulate a different relationship between the individual and the state However the projects in this study act as individual pieces of the state s insufficient social safety net and are only beginning to articulate a new relationship between food and
