**Social** – To do with people; how and where they live

**Economic** – To do with jobs, trade, business and money

**Sustainability** – Using the world's resources without damaging or wasting them for future generations

Scale is used to represent distance on a map. 1:50,000 means one cm on the map is 500m or 0.5km or 1/2kilometre.

## Continents and Oceans of the World

There are 7 continents in the world

Latitude and longitude are measured in degrees. Latitude runs East to West. There are 360 lines of latitude. The equator is the line of latitude that splits the earth into two hemispheres. Lines of longitude run North to South. There are 360 lines of longitude. The prime Meridian runs through London.

**Map symbols** help us to understand what appears on the map. They give us a useful guide to what we can expect to see when we're out and about exploring. Maps have a key so we know what the symbols mean.

**Grid references** allow you to find 10m<sup>2</sup> areas (4 figure references) or pinpoint spots (6 figure references) on a map. When working out grid references you use the bottom numbers first then the side numbers second.

## Six-figure grid references

In your head, you should be able to divide all sides of the square into ten equal sections. By doing this, you can pinpoint locations within the square – these are called six-figure grid references.

**REMEMBER:** Bottom number first then side numbers second

## Countries of Europe

There are 51 independent states in Europe

Most people in the UK live in cities. Most cities are in Northern, Central and South East England

Relief means how high or flat an area is. Britain has mountainous relief in the North and West, but flatter relief in the South and East

The United Kingdom includes England, Scotland, Wales and Northern Ireland

**Population density** is how many people live in a certain area. This is measured in people per square km. Densely populated areas have many people (for its size) and sparsely populated areas have few people per square km.

**Dense population** on cities  
Lots of jobs  
Many schools and services  
Good roads and accessibility

**Sparsely population** in rural areas  
Fewer jobs  
Fewer schools and services  
Inaccessible (remote)

**Profit and Prejudice** Paul Donovan, 2020-11-05 Avoiding prejudice will be critical to economic success in the fourth industrial revolution It is not the new and innovative technology that will matter in the next decade but what we do with it Using technology properly with diverse decision making is the difference between success and failure in a changing world This will require putting the right person in the right job at the right time Prejudice stops that happening Profit and Prejudice takes us through the relationship between economic success and prejudice in labour markets It starts with the major changes that occur in periods of economic upheaval These changes tend to be unpopular and complex and complexity encourages people to turn to the simplistic arguments of scapegoat economics and prejudice Some of the changes of the fourth industrial revolution will help fight prejudice but some will make it far worse The more prejudice there is the harder it will be for companies and countries to profit from the changes ahead Profit is not the main argument against prejudice but can certainly help fight it This book tells a story of the damage that prejudice can do Using economics without jargon students investors and the public will be able to follow the narrative and see how prejudice can be opposed Prejudice is bad for business and the economy Profit and Prejudice explains why

**Urban Competitiveness** Peter Kresl, Daniele Ietri, 2014-08-27 During the past 25 years the burden of managing economic policy for competitiveness has devolved to cities and to urban regions National governments have increasingly been focused on staving off fiscal collapse Mayors and local administrations have become very creative and active in looking after the state of their local economy and have developed extensive agencies for inter city cooperation and

action This book explores this evolving role of cities and urban regions Intelligent and rational policy must be based on an accurate understanding of the situation at hand and of the economic theory that can be utilized in the assessment of the most effective means that can be deployed This book examines the theoretical contributions of economists and geographers and through the analyses of the performance of various cities will give the reader an understanding of the logic behind rational policy formation Evaluation of a city's relative competitiveness is a controversial matter and this book provides a full treatment of the various approaches Finally it examines the experiences with competitiveness of several cities in North America and in Europe Urban Competitiveness Theory and Practice confirms that many cities in trying times do have a mechanism for enhancing their competitiveness and can work to create the sort of economic life the city's residents want
