## **Chapter 5: THEORY OF CONSUMER BEHAVIOR**

### **Essential Concepts**

---

1. The basic consumer optimization problem facing each individual can be stated as follows: Individual consumption decisions are made with the goal of maximizing total satisfaction from consuming various goods and services, subject to the constraint that spending on goods exactly equals the individual's money income.
2. Basic consumer theory assumes that buyers are completely informed about all things that matter to consumers: the range of products available, the prices of all products, the capacity of products to satisfy, and their income.
3. Consumer theory requires that consumers be able to rank all consumption bundles according to the level of satisfaction they would receive from consuming the various bundles.
4. Consumer preference ranking must satisfy two properties: preferences must be complete and transitive. Preferences are complete when for every possible pair of consumption bundles, *A* and *B*, the consumer can say one of the following relations holds: *A* is preferred to *B*, *B* is preferred to *A*, or the consumer is indifferent between *A* and *B*. Preferences are transitive when they are consistent in the following

Handbook of Research on the Applications of International Transportation and Logistics for World Trade Ceyhan, Gökçe Çiçek, 2019-12-06. In today's developing world, international trade is a field that is rapidly growing. Within this economic market, traders need to implement new approaches in order to satisfy consumers' rising demands. Due to the high level of competition, merchants have focused on developing new transportation and logistics strategies. In order to execute effective transportation tactics, decision makers need to know the fundamentals, current developments, and future trends of intercontinental transportation. The *Handbook of Research on the Applications of International Transportation and Logistics for World Trade* provides emerging research exploring the effective and productive solutions to global transportation and logistics by applying fundamental and in-depth knowledge together with current applications and future aspects. Featuring coverage on a broad range of topics such as international regulations, inventory management, and distribution networks, this book is ideally designed for logistics authorities, trading companies, logistics operators, transportation specialists, government officials, managers, policymakers, researchers, academicians, and students. **Journal of Economic Literature**, 1986.
