Guy Peters,2015-03-13 From the first specialization and coordination have presented governments with a conundrum specialized program might be best for delivering one service to the public but combining such programs for all public services inevitably produces costly redundancies and inefficiencies In this long awaited book Guy Peters brings his expertise and extensive experience to bear

on the problem of administrative and policy coordination Through theory and four real world case studies he explores how and whether coordination can transform ordinary flawed patterns of governing into more effective and efficient performance by the public sector This timely work arrives at a moment when coordination is proving especially challenging as popular approaches to public administration emphasize breaking larger public organizations into smaller single purpose programs and as a push to involve the private sector in policy development and implementation has increased government segmentation For insights into the workings and limitations of coordination or horizontal management Peters draws on extensive scholarship as well as his own consulting work with governments including Finland Serbia Bosnia and Herzegovina Canada and Mexico He highlights practical successes and failures of horizontal management in case studies of Homeland Security in the US child protection in the UK policymaking in Finland and the operations of the European Union In the process Peters evaluates a full tool chest of instruments that might be used to enhance coordination Combining theory and practice and considering a wide range of public policy challenges this book clearly and cogently presents the most comprehensive in depth and detailed discussion available of policy coordination in the public sector at a time when its insights are most urgently needed
