**Practical Manual of the Fascial Distortion Model in the paediatrics** Frank Römer, 2021-02-10 Until now the Fascia Distortion Model in short FDM has so far played no significant role in the treatment of infants As our smallest patients haven't any previously learned body language a classical treatment according to FDM is virtually impossible With adults it is possible to discuss their symptoms and indicate where the problem lies this is more or less ruled out with infants Here we have to rely rather on the results from the clinic and palpation as well as our experience with FDM As we know as FDM therapists FDM treatment is often accompanied by pain but is also very successful If our little patients have painful distortions then it is the least we can do but to try and relieve that pain Unfortunately this process is as painful for younger patients as for adults Here the question for therapists is whether such treatment is possibly incompatible with their consciences In my view it is almost a duty of the therapist to relieve the infant from his suffering Let's administer brief pain during treatment knowing that in the end it is for the good of the child Due to the great suppleness of the tissue in younger years we can achieve a great deal of success within the first one or two treatments This makes using FDM with infants so interesting As with my first book as also here I will adorn myself mainly with false laurels This work could only arise due to the help of some ingenious minds that have already set milestones before me in FDM therapy My intention now is to filter the developments made by some renowned therapists and together with my experience implement this for the treatment of infants Among the great therapists who have inspired me are Andrew Taylor Still William Sutherland Stephen Typaldos and Tom Esser Especially through the latter did I discover my love of treating infants and children For this dear Tom I retrospectively send you my sincerest thanks I want to also thank my family who have not only seen little of me due to my practice and seminar activities but also due to my writing this book I always had you in my thoughts I hope all readers take pleasure in this book and also hope that I can remove the insecurities and fears about the treatment of infants and also present some worthwhile ideas If we therapists don't help children then who will Baby Bargains Denise Fields, Alan Fields, 2001 Wow A baby book that actually answers the big question about having a baby How am I going to afford all this With the average cost of a baby topping 6600 for just the first year alone you need creative solutions and innovative ideas to navigate the consumer maze that confronts all parents to be Baby Bargains is the answer Inside you'll discover The best Web sites that offer the biggest discounts Name brand reviews of car seats bedding strollers high chairs diapers and more Five wastes of money with baby clothes and the best outlet bargains Seven tips to saving money on cribs plus in depth reviews of crib brands The truth about strollers and which brands work best in the real world The seven most ridiculous baby products Dozens of safety tips to affordably baby proof your home Detailed charts that compare brands of cribs strollers car seats and more Book jacket Baby Bargains Alan Fields, Denise Fields, 2005 This book lists great deals and money saving strategies for a wide variety of must have items from maternity wear baby clothes and diapers to furniture bedding and toys
