*Mathematics Education in East Africa* Anjum Halai, Geoff Tennant, 2016-03-08 This Open Access book is a valuable resource for policymakers and practitioners as it brings insights mainly from developing countries where relatively less research activity takes place. It is also a valuable resource for courses in mathematics education in the teacher education colleges and departments of education in the sub-Saharan Africa region. In the increasingly global and technological world, mathematics is seen as a significant gatekeeper of opportunities for social and economic advancement and mobility. Hence, countries and development agencies in the broader sub-Saharan Africa region are looking towards increasing access to relevant and high quality secondary education as a lever towards economic development. Policy makers and other key decision makers in education look towards improvement in mathematics teaching and learning as a key focus in education reform. In the East Africa region also, a number of initiatives have been taken at the national level in the respective countries to improve the quality of mathematics education. This book provides an in-depth comparative analysis of the developments and issues in mathematics education in Kenya, Tanzania, Rwanda, and Uganda and advances our understanding of the state of secondary mathematics education in East Africa. **School Science Practical Work in Africa** Umesh

Ramnarain, 2020-06-01 *School Science Practical Work in Africa* presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research-informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry-based learning, which signals a definite paradigm shift from the traditional teacher-dominated to a learner-centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work, and professional development in teaching practical work. This book will be of great interest to academics, researchers, and postgraduate students in the fields of science education and educational policy. *Excel in CRE* Livinus Wesonga, 2014-07-09 *Excel in CRE* book is written to assist both learners and teachers in Secondary Schools to prepare for the Kenya Certificate of Secondary Education. It aims at meeting the requirements of both the Kenya National Examinations Council and the Kenya Institute of Curriculum Development syllabi. It is complete with examination tips to guide learners, especially candidates, on how to tackle exams in the subject. The purpose of the book is to guide learners in identifying the areas that are examined in Paper 1 and 2, since it outlines the topics in the order in which they are examined in each of the two Papers. It aims at providing insight to the learners and to equip them with the necessary knowledge with which to relate with God, themselves, and with others in the society. It builds moral values in the learner. This book ends with past KCSE papers from 2006 to 2013, Papers 1 and 2, plus
