Legal and Organizational Practices in Nonprofit Management

Pasquale Ferraro, 2021-10-25 Leaders of nonprofit organizations everywhere believe passionately in what they are doing They often put in long hours and with little or no remuneration they are willing to do everything and anything to further the work of their organizations In most Western countries nonprofit leaders have had easy access to myriad support agencies professional training and self help publications In developing countries this is not always the case The manager of a local regional or even national NGO rarely has formal training in the skills needed to manage efficiently Fortunately academic curricula designed specifically for the nonprofit sector are becoming more and more common in business schools around the world This development alone reflects the importance and validity that the sector has earned Governments everywhere are downsizing This process has inevitably shifted services that were once the province of government to non governmental entities If NGOs are to fill the void left by government they must not only achieve excellence in their substantive field but must also be capable of delivering services using sound business practices Otherwise they are doomed to failure The future of these organizations will depend upon their ability to manage their resources efficiently The topics covered in this volume

among the first of its kind to be written by a European with extensive experience in developing and transition countries provide basic survival tactics for small organizations with limited staff and resources The practical advice given by the author will contribute to the sustainability of the many NGOs in developing and transition economy countries that are struggling to succeed under challenging odds

Performance Measurement in Non-Profit Organizations Patrizia Gazzola, Stefano Amelio, 2022-09-26 Performance Measurement in Non Profit Organizations The Road to Integrated Reporting addresses the issue of performance measurement in nonprofit companies with the aim of defining a system of useful measures to understand manage and improve the performance of such companies by employing systems theory to examine their conditions of existence and manifestations of life From the proposed company model follows that the system of performance measures should make it

possible to keep under control both the productive transformation with the physical technical efficiency indicators and the economic transformation with the economic efficiency indicators and the financial transformation with the financial efficiency indicators and finally the managerial transformation with the effectiveness indicators taking into account the degree of satisfaction of the expectations of the main categories of company stakeholders Readers will understand that economic analysis alone is not sufficient to assess the performance of such organizations but it is necessary to unite it with the analysis of sustainability dimensions It would therefore be appropriate to draw up an integrated report that combines the economic and financial dimensions with the pillars of sustainability as in the case of companies in the second sector There is a gap in the literature in this area that this book aims to fill making it a valuable resource to researchers academics and advanced students interested in performance evaluation of NPOs *Nonprofit Governance* Bruce R.
