**Homeschooling: The Primary Years** Shirley Erwee, 2015-07-13 An invaluable guide for families embarking on the journey of educating their primary school age children at home One of the biggest challenges for homeschooling parents is to break away from the model of education they received in school and to re educate themselves about Education as the conventional classroom methodology is not the model of pedagogy teaching that works best in the homeschool scenario This book offers tried and tested alternatives that will enrich and facilitate learning rather than hinder the process of educating young minds Having been part of the first generation of South African homeschoolers the author shares her knowledge plus tips and advice she has learnt along the way in order to help others make good choices and avoid common pitfalls and costly mistakes

**South African National Bibliography**, 1994 Hunger and Poverty in South Africa Jacqueline Hanoman, 2017-09-01 Hunger and Poverty in South Africa The Hidden Faces of Food Insecurity explores food insecurity as an issue of socioeconomic political cultural and environmental inequity and inequality Based on extensive original research in Free State Province South Africa the book explores how people living in poverty make meaning of their food circumstances within the socio cultural political and economic contexts of post apartheid South Africa how they view the government s food security policies and programs and their perceived agency to affect change The personal narratives contained in the book show that food insecurity is shaped by many issues among which are structural poverty racism attempts or non attempts at reconciliation during and after apartheid public health issues such as HIV AIDS and environmental circumstances At a time when most discourse around food insecurity focuses on how to provide more food to people facing hunger this book s multidimensional approach is a valuable contribution to the contemporary dialogue on poverty food security insecurity sustainability and democratic agency both within South Africa and around the world This book will be of interest to researchers in the areas of food security multidimensional poverty democratic agency and sustainable development both in South Africa and internationally

*Assessing Academic Literacy in a Multilingual Society* Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience

**Creating Conditions for Student Success** Magda Fourie-Malherbe, 2021-12-15 The various chapters of this book have brilliantly provided

perspectives on creating conditions for success in higher education from a wide variety of stakeholders within a university environment. The rich content comes from varying fields of study as well as academic development and student affairs directorates within the institution. This is what is exciting about the book. The diversity of focus in chapters makes the book relevant to anyone with interest in higher education matters. From the opening to the closing chapter, students are making a contribution on what the university has done or is doing for them to succeed or what it should consider doing to improve its service to students. This touches on every environment that students find themselves in a university setting, from residences to the classroom to commuter or off-campus students. The book's extended use of the capabilities approach and critical social theories has enabled it to provide nuances on not only the success of students but more importantly about how the higher education environment can transform itself to practices relevant for the sector today. The various research studies in this book can benefit similar university contexts nationally and internationally. *Kaapse bibliotekaris*, 2014.
