CHAPTER 1: TEN PRINCIPLES OF ECONOMICS

SOLUTIONS TO TEXT PROBLEMS

The following are solutions to the problems within the text.

QUESTIONS FOR REVIEW

1. Examples of trade-offs include time trade-offs (such as studying one subject over another or studying at all compared to engaging in social activities) and spending trade-offs (such as whether to use your last 15 dollars to purchase a pizza or to buy a study guide for that tough economics course).
2. To figure out the opportunity cost of a vacation to an amusement park, you would include the monetary costs of: admission, travel, souvenirs. You would also include the cost of time spent on vacation. The time cost depends on your next best use of that time; if it is staying home and watching TV, the time cost may be small, but if it is working extra hours at your job, the time cost is the money you could have earned. You would NOT include the costs of food and lodging unless they exceeded the costs you would have incurred had you not gone on vacation. In that case, you would only include the additional costs, not the total costs of food and lodging.
3. The marginal benefit of a glass of water depends on your circumstances. If you have just run a marathon or you have been walking in the desert sun for three hours, the marginal benefit is very high. But if you have been drinking a lot of liquids recently, the marginal benefit is quite low. The point is that even the necessities of life, like water, do not always have large marginal benefits.
4. Policymakers need to think about incentives so they can understand how people will respond to the policies they put in place. The text's example of seat belt laws shows that policy actions can have unintended consequences. If incentives matter a lot, they may lead
