The Art of Seamanship Ralph Naranjo, 2014-09-12. Wind, waves, weather, and water demand the practiced art of seamanship. Planning and reacting to the unanticipated are the flip sides of seamanship. This blending of pre-voyage preparedness with effective on-the-water response is learned rather than inherent; together, they define the art of seamanship. Author RALPH NARANJO: Each time a sailboat casts off its docklines, the sailor enters a marine realm that demands knowledge, preparedness, vigilance, and coolheadedness; these qualities are the foundation of good seamanship. Both an art as well as a science, seamanship is also the mastery of numerous practical details, from the best choice of line for a jib sheet to an accurate assessment of the passage of a deep low-pressure system. Around the world sailor Ralph Naranjo, technical expert, ocean racer, former Vanderstar Chair at the U.S. Naval Academy, delivers a priceless reference for anything that comes up while on the water, sharing all the knowledge today's sailors need to hand reef and steer. An enduring reference to the collective skills of the bluewater sailor, Naranjo's vast knowledge is supported by real-life examples of sailing mishaps, sample itineraries, vibrant photos, as well as first-hand accounts and sidebars from top sailors and marine experts, including Shelia McCurdy, Chuck Hawley, Lee Chesneau, and Paul Miller. N.A. Seamanship is a dynamic art demanding full attention from the sailor amidst a constant flow of information and knowledge. *The Art of Seamanship* will improve your problem-solving skills.
