Railway Accounts and Finance J. Alfred Fisher, 2015-06-16 Excerpt from *Railway Accounts and Finance: An Exposition of the Principles and Practice of Railway Accounting in All Its Branches*. It has not been thought necessary to make many alterations in the text of this edition. Variations in form and detail connected with the compilation of statistical and other returns have been made since the publication of the Second Edition, but the principles of Railway Accountancy involved in recording and controlling expenditure and receipts and in effecting periodical settlements between companies through the Railway Clearing House and otherwise remain unaltered. These principles have now, however, a far wider application than formerly. This is due not only to natural expansion and development but to the larger acquisition by Railway Companies of subsidiary services such as steamboats, harbours, docks, highway motors, hotels, etc. any imperfections that remain are intentionally left to preserve the state of such historical works.
