### **Limpopo Paper 1 Life Sciences 2013:**

*Spatial Approaches in African Archaeology* Cameron Gokee, Carla Klehm, 2023-01-01 This book explores the interplay between African archaeology and geospatial methods from three broad perspectives First several contributors examine the technical possibilities and limits of using satellite imagery to detect archaeological sites and model their physical environs A second perspective is the integration of new geospatial data and methods into site and landscape scale analyses to better address questions about social organization and subjective experience in African pasts A final perspective considers the interplay between geospatial technologies and community archaeology in Africa Recognizing that GIS and RS supersede traditional divisions in African archaeology such as different periods geographic regions and theoretical orientations the chapters aim to be widely applicable Arranged by methodological emphasis the case studies move from technical discussions of specific geospatial tools to general applications for addressing specific sociohistorical topics Each chapter clearly explains the links between their archaeological questions and analytical methods as well as how their results advance our understanding of African pasts and heritage resources Many of the chapters can serve as learning models for archaeologists who are new to GIS or curious about its applications to their work Others represent recent advances in geospatial applications of greater interest to more seasoned GIS practitioners demonstrating the potential for African scholarship to contribute to methodological innovations This book is of interest to students and researchers of African and historical archaeology and anthropology Previously published in *African Archaeological Review* Volume 37 issue 1 March 2020 *The Origin and Growth of Geography as a discipline at South Africa Universities* Gustav Visser, Ronnie Donaldson, Cecil Seethal, 2016-09-20 **Financial Inclusion and Digital Transformation Regulatory Practices in Selected SADC**

**Countries** Howard Chitimira, Tapiwa Victor Warikandwa, 2023-03-28 This book investigates the regulation and promotion of financial inclusion and provides a comparative analysis of the regulation promotion and enforcement of the relevant laws in the SADC in particular South Africa Namibia Botswana and Zimbabwe as well as the challenges of financial inclusion In turn it evaluates financial inclusion in the context of specific challenges faced by unbanked and underbanked customers who are easy targets for cyber criminals because they tend to have lower levels of digital literacy The book presents novel discussions that identify the challenges and flaws associated with the enforcement of financial inclusion laws and related measures intended to promote financial inclusion in the SADC region This is primarily done in order to reveal the current strengths and weaknesses of financial inclusion laws in relation to certain aspects of the companies securities and financial markets in the region For example there is no common financial inclusion instrument law that is effectively and uniformly applied throughout the SADC This has impeded the enforcement authorities efforts to effectively combat financial exclusion across the region The book is likely the most comprehensive study to date on the regulation and promotion of financial inclusion in the SADC region and fills a major gap in SADC and African legal jurisprudence As such it offers a valuable asset for

policymakers attorneys bankers securities share holders and other market participants who deal with financial inclusion as well as undergraduate and graduate students interested in the topic      **Family Demography and Post-2015**

**Development Agenda in Africa** Clifford O. Odimegwu, 2019-08-27 This book is a comprehensive analysis of the structure determinants and consequences of changes in sub Saharan African families thereby representing an Afrocentric description of the emerging trends It documents various themes in the sub disciplines of family demography The first section of the book focuses on philosophical understanding of African family its theoretical perspectives and comparative analysis of family in the 20th and 21st centuries The second section covers family formation union dissolution emerging trend in single parenthood and adolescents in the family The following section describes types determinants and consequences of African family changes health childbearing youth development teen pregnancy and family violence and the last chapter provides systematic evidence on existing laws and policies governing African family structure and dynamics As such it illustrates the importance of family demography in African demographic discourse and will be an interesting read to scholars and students in the field of demography social workers policy makers departments of Social Development in countries in Africa and relevant international agencies and all those interested in understanding the African family trajectory      Climate change and agriculture in the Sudan: Impact pathways beyond changes in mean rainfall and temperature Siddig, Khalid, Stepanyan, Davit, Wiebelt, Manfred, Zhu, Tingju, Grethe, Harald, 2018-09-26 Several environmental changes have occurred in the Sudan in the past several are ongoing and others are projected to happen in the future The Sudan has witnessed increases in temperature floods rainfall variability and concurrent droughts In a country where agriculture which is mainly rainfed is a major contributor to gross domestic product foreign exchange earnings and livelihoods these changes are especially important requiring measurement and analysis of their impact This study not only analyzes the economy wide impacts of climate change but also consults national policy plans strategies and environmental assessments to identify interventions which may mitigate the effects We feed climate forcing water demand and macro socioeconomic trends into a modelling suite that includes models for global hydrology river basin management water stress and crop growth all connected to the International Model for Policy Analysis of Agricultural Commodities and Trade IMPACT The outcomes of this part of the modeling suite are annual crop yields and global food prices under various climate change scenarios until 2050 The effects of such changes on production consumption macroeconomic indicators and income distribution are assessed using a single country dynamic Computable General Equilibrium CGE model for the Sudan Additionally we introduce yield variability into the CGE model based on stochastic projections of crop yields until 2050 The results of the model simulations reveal that while the projected mean climate changes bring some good news for the Sudan extreme negative variability costs the Sudan cumulatively between 2018 and 2050 US 109.5 billion in total absorption and US 105.5 billion in GDP relative to a historical mean climate scenario without climate change      Empowerment, adaptation, and agricultural production Wouterse, Fleur

Stephanie,2017-05-19 Located at the heart of West Africa Niger is a landlocked country with three quarters of its territory covered by the Sahara Desert Niger s climate is mostly arid and it is one of the least developed countries in the world The vast majority of its population lives in rural areas and the country is strongly dependent on agriculture Agriculture is predominantly rainfed and yields rely on one rainy season Although productivity in Niger has shown a positive trend agriculture has been strongly affected in recent decades by several crises partly or entirely due to extreme weather events Farmers pursue a number of strategies in the face of climatic and nonclimatic stressors including soil and water conservation methods such as barriers terracing and planting pits and their adaptive capacity is deemed critical for estimating the economic impact of climate change An understanding of climate change adaptation processes at the farm household level is therefore crucial to the development of well designed and targeted mitigation policies In this study we use new data from Niger and regression analysis to study climate change adaptation through the digging of za pits and food production and the role of human capital measures therein We find that adaptation is influenced by the perception that the frequency of droughts has increased and by the availability of financial resources and household labor Adaptation is also influenced by educational attainment both formal and Koranic school education Adaptation of za pits is found to play an important role in food productivity Our counterfactual analysis reveals that even though all households would benefit from adaptation the effect is found to be significantly larger for households that actually did adapt relative to those that did not indicating that the prospects of closing the productivity gap through encouraging adaptation in less well endowed households are limited

Agricultural Transformation in Ethiopia Atakilte Beyene,2018-10-15 For thousands of years Ethiopia has depended on its smallholding farmers to provide the bulk of its food needs But now such farmers find themselves under threat from environmental degradation climate change and declining productivity As a result smallholder agriculture has increasingly become subsistence oriented with many of these farmers trapped in a cycle of poverty Smallholders have long been marginalised by mainstream development policies and only more recently has their crucial importance been recognised for addressing rural poverty through agricultural reform This collection written by leading Ethiopian scholars explores the scope and impact of Ethiopia s policy reforms over the past two decades on the smallholder sector Focusing on the Lake Tana basin in northwestern Ethiopia an area with untapped potential for growth the contributors argue that any effective policy will need to go beyond agriculture to consider the role of health nutrition and local food customs as well as including increased safeguards for smallholder s land rights They in turn show that smallholders represent a vitally overlooked component of development strategy not only in Ethiopia but across the global South **Towards the Sustainable Use of African**
