All over the world economic inclusion has risen to the top of the development discourse. A well performing education system is central to achieving inclusive development but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation. The Politics and Governance of Basic Education explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making progress combining practical steps to achieve incremental gains to re-orient the system towards learning. The book is a follow up to the well known *Health care in South Africa* structure and dynamics Van Rensburg Fourie Pretorius 1992 published just before the transition to a democratic society. The book retains a strong historical thread but the focus is generally on the nature of the transformation process, gains made and failures encountered. **Report of the Annual Meeting of the South African Association for the Advancement of Science**, 2007 Water South Africa, 2004 Kaapse bibliotekaris, 2006 Issues for Nov 1957 include section Accessions Aanwinste Sept 1957 **Journal of Psychology in Africa**, 2010
