

OPERATING THE MACHINE

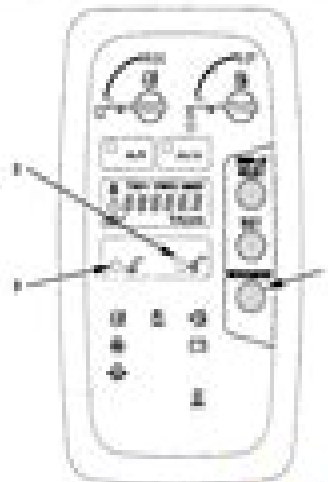

WORK MODE

Two work modes can be selected for most appropriate front and swing speeds for the work to be performed.

When the engine is started, the digging mode is automatically set. Each time work mode switch (1) is pressed, the two following modes are selected alternately:

- Digging Mode
- Attachment Mode

The selected work mode is indicated by attachment mode indicator (2) or digging mode indicator (3). Select the work mode corresponding to the work in which the machine is engaged while referring to the table below.

	Work Mode	Description
	General Purpose Mode	Designed for general digging and truck loading.
	Attachment Mode	Select this mode when using attachments other than bucket.

POWER BOOST EXHAUSTIBLE

The power boost switch (4) is used to get maximum digging power, and is located on the top of the right control lever.

When the power boost switch (4) is pushed, increased boom attachment power will be supplied for about 8 seconds.
