*Minimum Deterrence: Examining the Evidence* Keith B. Payne, James Schlesinger, 2016-04-14 The National Institute for Public Policy's new book *Minimum Deterrence Examining the Evidence* is the first of its kind Dr Keith Payne former Secretary of Defense James

Schlesinger and an unparalleled bipartisan group of senior civilian and military experts critically examine eight basic assumptions of Minimum Deterrence against available evidence In general Minimum Deterrence does not fare well under the careful scrutiny Proponents of a Minimum Deterrent US nuclear force posture believe that anywhere from a handful to a few hundred nuclear weapons are adequate to deter reliably and predictably any enemy from attacking the United States now and in the future Because nuclear weapons are so destructive their thinking goes no foreign leader would dare challenge US capabilities The benefits advocates claim of reducing US nuclear weapons to the minimum level needed are better relations with Russia and China reinforcement of the arms control and Nonproliferation Treaty billions of defense dollars in savings and greater international stability on the way to nuclear zero As political pressure builds to pursue this vision of minimum US deterrence Minimum Deterrence Examining the Evidence stands as the seminal study to address the many claims of great benefit using available evidence This book was published as a special issue of Comparative Strategy     **Books in Print Supplement** ,1984     **Paperbound Books in Print** ,1992     **Government Reports Announcements** ,1974     **Government Reports Announcements & Index** ,1989     **Shell Aviation News** ,1964     *Who's who Among Students in American Universities and Colleges* Henry Pettus Randall,1974     Forthcoming Books Rose Army,1992     **Bogmarkedet** ,1995-04
