

#### Operating data storage and web server

The SIGMA CONTROL 2 stores all relevant messages in its event history and retains operating data for one year. This greatly simplifies the diagnostic process for precision service and maintenance work. The user interface displays machine status in real-time, signals from the analogue and digital inputs, and the remaining maintenance hour counter. It also lists warning/alarm messages and graphically displays pressure, temperature and speed trends.

#### "Plug & work" complete systems

Our boosters are delivered as complete turnkey systems, precisely matched to your requirements. Thanks to the pre-configured SIGMA CONTROL 2 controller, they are ready for connection and self-monitoring – a huge advantage for keeping installation work and costs to a minimum. KAISER is therefore the first manufacturer in the booster sector to offer such user-friendly complete solutions, all neatly contained within one compact enclosure.
