equivalent of an SADT actigram Beside this academical aspect LabVIEW can be used in a variety of forms creating projects that can spread over an enormous field of applications from control and monitor software to data treatment and archiving from modeling to instruments controls from real time programming to advanced analysis tools with very powerful mathematical algorithms ready to use from full integration with native hardware by National Instruments to an easy implementation of drivers for third party hardware In this book a collection of different applications which cover a wide range of possibilities is presented We go from simple or distributed control software to modeling done in LabVIEW from very specific applications to usage in the educational environment *Announcer* American Association of Physics Teachers,2003

Practical Applications and Solutions Using LabVIEW™ Software Silviu Folea,2011-08-01 The book consists of 21 chapters which present interesting applications implemented using the LabVIEW environment belonging to several distinct fields such as engineering fault diagnosis medicine remote access laboratory internet communications chemistry physics etc The virtual instruments designed and implemented in LabVIEW provide the advantages of being more intuitive of reducing the implementation time and of being portable The audience for this book includes PhD students researchers engineers and professionals who are interested in finding out new tools developed using LabVIEW Some chapters present interesting ideas and very detailed solutions which offer the immediate possibility of making fast innovations and of generating better products for the market The effort made by all the scientists who contributed to editing this book was significant and as a result new and viable applications were presented LabVIEW. National Instruments (Firm),2008 This course manual teaches the student how to use advanced connectivity in VIs This course manual assumes the student is familiar with Windows that the student has experience writing algorithms in the form of flowcharts or block diagrams and that the student has taken LabVIEW basics 1 and basics 2 or that the student is familiar with all the concepts discussed therein This course also assumes that the student has one year or more of LabVIEW development experience **NASA Tech Briefs** ,1993
