The recent news surrounding school shootings and previous accidents of police violence has brought back the debate about police equipment and functions. This month, President Biden signed a new "Executive Order on Advancing Effective, Accountable Policing and Criminal Justice Practices to Enhance Public Trust and Public Safety" (Laco). This document includes several changes to what law enforcement is allowed to do and which actions are considered banned. For example, police officers cannot use chokeholds, while carotid restraints can now be utilized only in critical situations necessitating deadly force.

However, the change that has raised the debate among police groups and law enforcement organizations is the decreased provision of military equipment and vehicles to police departments. According to Laco, the International Association of Chiefs of Police (IACP), Major Cities Chiefs Association (MCCA), and the National Fraternal Order of Police (NFOP) directly assisted with this order; they support the proposed changes. In contrast, the National Police Association (NPA) and the National Sheriff's Association (NSA) are critical of the document.

I chose this event because it is relevant to current events and is concerned with the never-ending debate about law enforcement and public protection. This executive order is a response to the events that have been widely televised over the last few years. In particular, as the signing happened on the anniversary of George Floyd's murder, it highlights the government's choice of pursuing police reform as a measure of control and future prevention. On the one hand, some changes made in this order may increase the quality of law enforcement services, as most major organizations agree (Laco). On the other hand, many law officers raise concerns about the limited access to military equipment for police departments. The lack of resources can damage the police's ability to respond to incidents with the necessary backup, which puts both victims and law enforcement at risk.

Furthermore, this decision further divides law enforcement organizations on how to approach the police and public safety – through restriction or support – making this event incredibly important for all citizens. While some police officers agree that the executive order's points can lead to better protection, others warn that such significant

**Policing** Richard K. Moule Jr., Bryanna Fox, 2021-03-30 American law enforcement and the public's perception of police is a topic of growing interest among academics, practitioners, and policymakers. From the 2014 events in Ferguson, MO and the alleged Ferguson Effect to the debate over the impact of body worn cameras (BWCs), police militarization, use of force, and other practices that may alter the public's view of police legitimacy and procedural justice, there is an increasing need for research addressing these contemporary issues in American policing. This book presents the latest research on these topics as well as related topics noted in the Presidential Task Force on 21st Century Policing such as police use of technology, transparency, oversight, and building trust with the community. The studies contained in this book examine these issues by leveraging empirical data on policing, public perceptions, crime, and diverse research methods to present high quality analysis of these timely and relevant topics in today's world. The chapters in this book were originally published as a special issue of the Journal of Crime and Justice. Police Administration Gary W. Cordner, 2016-03-02 This national best selling text examines police administration from multiple perspectives: a systems perspective emphasizing the interrelatedness among units and organizations; a traditional structural perspective; administrative principles, management functions, and the importance of written guidelines; a human behavioral perspective; the human element in organizations; and a strategic management perspective; communications and information systems; performance evaluation; strategies and tactics; and prevailing and promising approaches to increasing effectiveness of police agencies. Coverage of management functions and organizational principles is streamlined while providing a stronger emphasis on diversity principles and on developing police agencies as learning organizations. A concluding chapter covers contemporary issues including community engagement, collaboration, globalization, racial profiling, mass media, cybercrime, terrorism, and homeland security. Case studies based on real life events invite students to practice managing the conflicting circumstances, and Modern policing blog posts offer news and developments in the policing world. **Research Methods for Criminal Justice and Criminology** Dean J.
