

Newton's law of universal gravitation

Newton determined that every object in the universe attracts every other object with a force.

But that seems untrue.....

My book isn't attracted to my desk and my water bottle isn't attracted to the wall.

Yet my body is attracted to the earth (gravitational force). When I jump up, I get pulled straight back down to earth. Why are these contradicting things happening?

It seems that some things are attracted to each other and others are not.
