Classrooms Kevin D. Finson,Jon Pedersen,2015-03-01 This book examines visual data use with students PK 16 as well as in  
pre service in service science teacher preparation Each chapter includes discussion about the current state of the art with  
respect to science classroom application and utilization of the particular visual data targeted by the author s discussion and  
explanation about the targeted visual data as applied by the author in his her classroom use of visual data as a diagnostic tool  
its use as an assessment tool and discussion of implications for science teaching and or science teacher preparation Although  
the body of research and practice in this field is growing there remains a gap in the literature about clearly explicating the  
use of visual data in the science classroom A growing body of literature discusses what visual data are although this topic is  
still viewed as being at the beginning of its development in educators thinking and there are some scattered examples of  
studies exploring the use of visual data in science classrooms although those studies have not necessarily clearly identified  
their foci as visual data per se As interest and attention has become more focused on visual data a logical progression of  
questioning has been how visual data are actually applied in the science classroom whether it be early elementary college or  
somewhere in between Visual data applications of interest to the science education community include how it is identified  
how it can be used with students and how students can generate it themselves how it can be employed as a diagnostic tool in  
concept development and how it can be utilized as an assessment tool This book explores that as well as a variety of  
pragmatic ways to help science educators more effectively utilize visual data and representations in their instruction
