**General Description**

The Mini-Excavator body and framework is of fabricated steel construction and comprises the upper structure, undercarriage and front attachments. The upper structure comprises a fabricated steel base that provides housing and mounting for the machine controls and services above and below floor plates. The machine cab/canopy is mounted on the mainframe. The engine is mounted behind the cab.

The undercarriage for 8014/8015/8016 machines comprises a fabricated chassis that provides housing and mounting for the machine track gear, slew ring and related services. The undercarriage for 8017/8018 machines comprises an extending fabricated chassis that provides housing and mounting for the machine track gear, slew ring and related services. This extending chassis is in two halves that telescope together and are connected with a hydraulic ram.
