perform experiments and don't just show the end results The text is written in a friendly conversational tone to put students at ease as they discover organize and understand the material presented in each chapter **Laboratory Manual Human Physiology** Stuart Fox, 2010-08-30 The Laboratory Guide to Human Physiology 14th Edition is a stand alone human physiology manual that can be used in conjunction with any human physiology textbook It includes a wide variety of exercises that support most areas covered in a human physiology course allowing instructors the flexibility to choose those exercises best suited to meet their particular instructional goals Background information that is needed to understand the principles and significance of each exercise is presented in a concise manner so that little or no support is needed from the lecture text
