**Indigenous Rights and Water Resource Management** Katie O'Bryan, 2018-10-26 In an era of climate change the need to manage our water resources effectively for future generations has become an increasingly significant challenge Indigenous management practices have been successfully used to manage inland water systems around the world for thousands of years and Indigenous people have been calling for a greater role in the management of water resources As First Peoples and as holders of important knowledge of sustainable water management practices they regard themselves as custodians and rights holders deserving of a meaningful role in decision making This book argues that a key albeit not the only means of ensuring appropriate participation in decision making about water management is for such participation to be legislatively mandated To this end the book draws on case studies in Australia and New Zealand in order to elaborate the legislative tools necessary to ensure Indigenous participation consultation and representation in the water management landscape

**Displaced Comrades** Ebony Nilsson, 2023-11-02 Exploring the lives of left wing Soviet refugees who fled the Cold War to settle in Australia this book uncovers how they adjusted to life under surveillance in the West [Yearbook of International Organizations 2014-2015, Volumes 1a & 1b \(Set\)](#) Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events **Industrial Arts Index**, 1922

**The Art and Science of Making the New Man in Early 20th-Century Russia** Yvonne Howell, Nikolai Kremmentsov, 2021-12-02 The idea that morally mentally and physically superior new men might replace the currently existing mankind has periodically seized the imagination of intellectuals leaders and reformers throughout history This volume offers a multidisciplinary investigation into how the new man was made in Russia and the early Soviet Union in the first third of the 20th century The traditional narrative of the Soviet new man as a creature forged by propaganda is challenged by the strikingly new and varied case studies presented here The book focuses on the interplay between the rapidly developing experimental life sciences such as biology medicine and psychology and countless cultural products ranging from film and fiction dolls and museum exhibits to pedagogical projects sculptures and exemplary agricultural fairs With contributions from scholars based in the United States Canada the UK Germany and Russia the picture that emerges is emphatically more complex contradictory and suggestive of strong parallels with other new man visions in Europe and elsewhere In contrast to previous interpretations that focused largely on the apparent disconnect between utopian new man rhetoric and the harsh realities of everyday life in the Soviet Union this volume brings to light the surprising historical trajectories of new man visions their often obscure origins acclaimed and forgotten champions unexpected and complicated results and mutual interrelations In short the volume is a timely examination of a recurring theme in modern history when dramatic advancements in science and technology conjoin with anxieties about the future to fuel dreams of a new and improved mankind

*Moral Capitalism* Steven Pearlstein, 2018-09-25 The Pulitzer Prize winning economics journalist

explains how America's capitalist system is broken and how it can be repaired. With a new introduction by the author, thirty years ago greed is good and maximizing shareholder value became the new mantras woven into the fabric of our economy, politics, and business culture. Free market capitalism has lifted more than a billion people from poverty around the world. But in the United States, most of its benefits have been captured by the richest ten percent, and it has provided justification for squeezing workers, cheating customers, avoiding taxes, and leaving communities in the lurch. As a result, Americans are losing faith in the free market and the democratic institutions that support it. In *Moral Capitalism*, Pulitzer Prize-winning journalist Steven Pearlstein chronicles our descent and challenges the theories being taught in business schools and exercised in boardrooms nationwide. Missing from our current model are vital elements recognized long ago by Adam Smith and Charles Darwin: the mutual trust and cooperation necessary for capitalism to survive and thrive. Pearlstein shows how rising inequality of incomes and opportunity have eroded that social capital, and how restoring fairness need not come at the expense of economic growth. He concludes with bold steps to create a shared prosperity and revive our faith in American capitalism. Previously published as *Can American Capitalism Survive*, *Praise for Moral Capitalism*. If anyone can save capitalism from the capitalists, it's Steven Pearlstein. This lucid, brilliant book refuses to abandon capitalism to those who believe morality and justice irrelevant to an economic system. Ezra Klein, founder and editor at large, *Vox*. This book delivers a trenchant critique of the ravages of inequality and a passionate cry for greater balance. A powerful, idealistic book. *The Washington Post*.

**Trading Spaces** Emma Hart, 2024-07-06. Looks at the shift from the marketplace as an actual place to a theoretical idea and how this shaped the early American economy. When we talk about the economy, the market is often just an abstraction. While the exchange of goods was historically tied to a particular place, capitalism has gradually eroded this connection to create our current global trading systems. In *Trading Spaces*, Emma Hart argues that Britain's colonization of North America was a key moment in the market's shift from place to idea, with major consequences for the character of the American economy. Hart's book takes in the shops, auction sites, wharves, taverns, fairs, and homes of seventeenth and eighteenth-century America, places where new mechanisms and conventions of trade arose as Europeans recreated or adapted continental methods to new surroundings. Since those earlier conventions tended to rely on regulation more than their colonial offspring did, what emerged in early America was a less fettered brand of capitalism. By the nineteenth century, this had evolved into a market economy that would not look too foreign to contemporary Americans. To tell this complex transnational story of how our markets came to be, Hart looks back farther than most historians of US capitalism, rooting these markets in the norms of seventeenth and eighteenth-century Britain. Perhaps most important, this is not a story of specific commodity markets over time, but rather a history of the trading spaces themselves, the physical sites in which the grubby work of commerce occurred and where the market itself was born.

Reporting Inequality Sally Lehrman, *Venise Wagner*, 2019-03-04. Under increasingly intense newsroom demands, reporters often find it difficult to cover the complexity of

topics that deal with racial and social inequality This path breaking book lays out simple effective reporting strategies that equip journalists to investigate disparity s root causes Chapters discuss how racially disparate outcomes in health education wealth income housing and the criminal justice system are often the result of inequity in opportunity and also provide theoretical frameworks for understanding the roots of racial inequity Examples of model reporting from ProPublica the Center for Public Integrity and the San Jose Mercury News showcase best practice in writing while emphasizing community based reporting Throughout the book tools and practical techniques such as the Fault Lines framework the Listening Post and the authors Opportunity Index and Upstream Downstream Framework all help journalists improve their awareness and coverage of structural inequity at a practical level For students and journalists alike Reporting Inequality is an ideal resource for understanding how to cover structures of injustice with balance and precision *University of California Union Catalog of Monographs Cataloged by the Nine Campuses from 1963 Through 1967: Authors & titles* University of California (System).
