

## 3rd AGM of the BPA 24th October 2004

The AGM of the British Porphyria Association was held on Tuesday 24th October 2004 at Shirley Marwood Church, Birmingham.

There is a considerable change this year to the committee of the BPA, as is noted in the new constitution.

John Chamberlain (hyperporphyria.org.uk) was elected as the new chairman, and Leigh Treweek (leightreweek@porphyria.org.uk) as the new correspondence secretary.

We also elected the following officers, unopposed: Ann Kesteven (annkesteven@porphyria.org.uk) as Treasurer, Kirstine Chamberlain as elected secretary, Sandy Clark (sandy@bpa.org.uk) as secretary, and Karen Bland as elected monitoring officer.

It was announced that subscriptions will be collected from all members for the year at the beginning of each year. All members will be receiving a letter in January.

There was discussion regarding getting more staff to offer support to patients on to specialists.

We were pleased to welcome Dr Alex Hoang, who is currently working on research into field disease in EPP patients. He gave an interesting talk about his research. Following this we presented him with a cheque for £2500 towards his research.

Following the formal AGM there were refreshments and a quiz open to all for the evening.

## NON-PORPHYRIC SKIN DISEASE IN PORPHYRIA PATIENTS

**ACNE:** Topical treatments for acne to moderate acne are generally safe in patients with porphyria, though there is scant evidence in the literature. Unfortunately, none of the commonly used antibiotics are safe. Clindamycin, the most effective treatment for acne, is unsafe in the acute porphyria and should be avoided.

**ECZEMA:** Eczema is often associated with a combination of environmental and internal causes or irritants. These treatments are generally safe. Moisturisers keep the skin in good condition, which may help to avoid minor injuries or skin splits which may lead to poisoning. Gentle emollient creams as a precaution, given to help reduce itching. Topical phototherapy (Ultraviolet and PUVA) has been used successfully and should be avoided. Most of the antihistamines should be avoided. Corticosteroid systemic treatment for eczema, if necessary, and a safe topical one, both safe in all forms of porphyria. Ciclosporin, another agent occasionally used to treat eczema, is not safe. For subsequent treatment of eczema, see below under psoriasis.

**PSORIASIS:** Treatment with moisturisers and topical treatments is safe. Topical treatments such as Calcipotriol, Ointment and coal tar are not known to be harmful. Systemic treatments for psoriasis include: Methotrexate which must be used

with caution. Acitretin and Etretinate are both unsafe. Systemic light treatments are often used together with psoriasis treatments for both psoriasis and eczema, however it should be avoided for patients with photosensitive porphyria. Psoriasis treated with PUVA should be avoided for patients with photosensitive porphyria. Psoriasis should be avoided by those who have only of the acute porphyrias.

**SUN SENSITIVE:** Sometimes the skin needs to be protected with sun cream. The diagnosis can be benign tanning or malignant tumours. This is usually done under local anaesthetic. Most local anaesthetics are safe in porphyria, but Bupivacaine should be avoided.

**WARTS:** Preparations such as salicylic acid cream or paint are safe but care should be taken since the skin is photosensitive. This is also the case for cryosurgery.

# Laf Sbux Form
