Operations Research Proceedings 2022 Oliver Grothe, Stefan Nickel, Steffen Rebennack, Oliver Stein, 2023-08-29 This book gathers a selection of peer reviewed papers presented at the International Conference on Operations Research OR 2022 which was held at Karlsruhe Institute of Technology Germany on September 6 9 2022 KIT s Institute for Operations Research IOR hosted the conference together with the Institute for Industrial Production IIP the Institute for Automation and Applied Informatics IAI and the Institute for Material Handling and Logistics IFL The respective papers discuss classical mathematical optimization statistics and simulation techniques These are complemented by computer science methods and by tools for processing data designing and implementing information systems The book also examines recent advances in information technology which allow big data volumes to be processed and enable real time predictive and prescriptive business analytics to drive decisions and actions Lastly it includes problems modeled and treated while taking into account uncertainty risk management behavioral issues etc

Proceedings of the Canadian Society of Civil Engineering Annual Conference 2022 Rishi Gupta, Min Sun, Svetlana Brzev, M. Shahria Alam, Kelvin Tsun Wai Ng, Jianbing Li, Ashraf El Damatty, Clark Lim, 2023-08-05 This book comprises the proceedings of the Annual Conference of the Canadian Society of Civil Engineering 2022 The contents of this volume focus on specialty conferences in construction environmental hydrotechnical materials structures transportation engineering etc This volume will prove a valuable resource for those in academia and industry

Dynamic Behavior of Soft and Hard Materials, Volume 2 R. Velmurugan, G. Balaganesan, Naresh Kakur, Krishnan Kanny, 2024-03-22 This book comprises the select peer reviewed proceedings of the 13th International Symposium on Plasticity and Impact Mechanics IMPLAST 2022 It aims to provide a comprehensive and broad spectrum picture of the state of the art research and development in diverse areas such as constitutive relations theories of plasticity stress waves in solids earthquake loading high speed impact problems fire and blast loading structural crashworthiness and failure mechanics of penetration and perforation among others The contents focus on aspects of large deformations and failure of materials including metals composites cellular geomaterials or concrete and structures resulting from quasi static earthquake fire impact or blast loading This book is a valuable resource for researchers and professionals working in academia and industry in the areas of mechanical materials and aerospace engineering

International Handbook of Threat Assessment J. Reid Meloy, Jens Hoffmann, 2021 This introductory chapter sets forth three foundations for threat assessment and management the first foundation is the defining of basic concepts such as threat assessment and threat management the second foundation outlines the similarities and differences between threat assessment and violence risk assessment the third foundation is a detailed overview of the research findings theoretical avenues measurement instruments and developments in practice over the past quarter century The goal of our chapter is to introduce the professional reader to the young scientific field of threat assessment and management and to clarify and guide the seasoned

professional toward greater excellence in his or her work Current Perspectives and New Directions in Mechanics, Modelling and Design of Structural Systems Alphose Zingoni, 2022-09-02 Current Perspectives and New Directions in Mechanics Modelling and Design of Structural Systems comprises 330 papers that were presented at the Eighth International Conference on Structural Engineering Mechanics and Computation SEMC 2022 Cape Town South Africa 5 7 September 2022 The topics featured may be clustered into six broad categories that span the themes of mechanics modelling and engineering design i mechanics of materials elasticity plasticity porous media fracture fatigue damage delamination viscosity creep shrinkage etc ii mechanics of structures dynamics vibration seismic response soil structure interaction fluid structure interaction response to blast and impact response to fire structural stability buckling collapse behaviour iii numerical modelling and experimental testing numerical methods simulation techniques multi scale modelling computational modelling laboratory testing field testing experimental measurements iv design in traditional engineering materials steel concrete steel concrete composite aluminium masonry timber v innovative concepts sustainable engineering and special structures nanostructures adaptive structures smart structures composite structures glass structures bio inspired structures shells membranes space structures lightweight structures etc vi the engineering process and life cycle considerations conceptualisation planning analysis design optimization construction assembly manufacture maintenance monitoring assessment repair strengthening retrofitting decommissioning Two versions of the papers are available full papers of length 6 pages are included in the e book while short papers of length 2 pages intended to be concise but self contained summaries of the full papers are in the printed book This work will be of interest to civil structural mechanical marine and aerospace engineers as well as planners and architects *Advances in Agronomy* ,2024-04-23 Advances in Agronomy Volume 186 the latest release in this leading reference on agronomy contains a variety of updates and highlights new advances in the field each written by an international board of authors Includes numerous timely state of the art reviews on the latest advancements in agronomy Features distinguished well recognized authors from around the world Builds upon this venerable and iconic review series Covers the extensive variety and breadth of subject matter in the crop and soil sciences

Proceeding of the 3rd International Conference on Electronics, Biomedical Engineering, and Health Informatics Triwiyanto Triwiyanto, Achmad Rizal, Wahyu Caesarendra, 2023-04-28 This book presents high quality peer reviewed papers from the International Conference on Electronics Biomedical Engineering and Health Informatics ICEBEHI 2022 held at Surabaya Indonesia virtually The contents are broadly divided into three parts a Electronics b Biomedical Engineering and c Health Informatics The major focus is on emerging technologies and their applications in the domain of biomedical engineering It includes papers based on original theoretical practical and experimental simulations development applications measurements and testing Featuring the latest advances in the field of biomedical engineering applications this book serves as a definitive reference resource for researchers professors and practitioners interested in exploring advanced

techniques in the fields of electronics biomedical engineering and health informatics The applications and solutions discussed here provide excellent reference material for future product development

Unraveling inflammaging : A pathway to Prevent Age-related Disease in Animals Toshiro Arai, Takahiro Teshima, Osamu Yamato, Jose Ceron, 2025-01-13 The field of age related diseases in animals particularly focusing on the concept of inflammaging forms the basis of this research topic Inflammaging a term coined to describe the chronic proinflammatory state often associated with aging has been linked to a variety of degenerative diseases This low grade chronic inflammatory state is believed to result from an accumulation of damaged macromolecules and cellular debris due to increased production and inhibited damage surveillance and repair functions in multiple tissues The secretion of proinflammatory cytokines from senescent cells known as the senescence associated secretory phenotype SASP is thought to contribute to the onset of inflammaging In animals such as dogs and cats the longer they live the more diseases they develop similar to humans with inflammaging being a potential cause of various age related diseases The primary aim of this research topic is to delve deeper into the mechanisms of inflammaging in animals and its role in age related diseases The goal is to develop new diagnostic biomarkers for inflammaging which could potentially lead to early diagnosis and prevention of age related diseases In an aging society the increase in age related diseases is inevitable However the extension of healthy life years and the ability to stay healthy until old age are standard medical requirements Therefore the early diagnosis of inflammaging could be a significant step towards preventing various age related diseases in animals

Best Practice Approaches for Mixed Methods Research in Psychological Science, volume II Gudberg K. Jonsson, Mariona Portell, M. Teresa Anguera, José Luis Losada, Judith Schoonenboom, 2025-10-27 Having started as a small movement in the 1980 s the study of mixed methods research burst onto the scene around the beginning of the second millennium After decades of intense dispute between supporters of the qualitative perspective and their quantitative counterparts with both sides having grown deeply entrenched in their respective views a complementary approach promising the possibility of integration had finally been proposed By that time however the vast majority of researchers had committed to one stance or the other very few of us argued that the two approaches could be complementary Since then the number of publications scientific meetings and other activities devoted to the mixed methods approach has increased exponentially throughout the world At a substantive level we are pleased to see that a growing number of fields are generating mixed methods research and we are eager to assist in promoting this trend But naturally the field has experienced some growing pains a certain degree of heterogeneity in terms of approaches differences of opinion regarding certain conceptualizations for example mixed methods vs multimethods numerous design taxonomies multiple ways of integrating qualitative and quantitative elements and various positions on how best to overcome the enduring lack of symmetry between qualitative and quantitative aspects The methodological and substantive spectrum is vast and broad possibly because the mixed methods approach has become obligatory for much research not only in psychology but in practically all branches of the social
