and Other Generative AI Tools Jochen Kuhn,Stefan Küchemann,Knut Neumann, Martina Rau,2025-02-17 In the past ten years
 applications of generative artificial intelligence GAI have found rapidly growing use in medicine science and daily life Large
 language models LLMs opened up new avenues in particular for education LLMs have been used to create interactive
 educational content for students stimulate their curiosity generate code explanations and develop assessment questions
 Additionally LLMs been applied for language practice anxiety alleviation and feedback provision In higher education LLMs
 have shown potential for assisting in medical exam preparation and clinical decision making In school education LLMs can
 help teachers with automated evaluation of student responses and respective adaptive feedback More recently LLM based
 applications such as chatGPT have been used to generate teaching materials or assessment tasks across different subjects
 The fields understanding of the effects of the use of LLM based applications in classroom teaching however is still in its
 infancy GAI tools may help solving a range of tasks in education in particular with respect to teachers and students and
 teachers efforts to generate content However it is critical that teachers and students do not overly rely on GAI generated

solutions but instead critically assess each solution Students should furthermore not use GAI tools to avoid investing relevant mental effort to create mental models or more broadly build up competencies
