Gateways to the Southwest Jay M. Price, 2004-02 Arizona is home to some of the region's most stunning national parks and monuments and has had a long tradition of strong federal agencies along with effective local governments developing and managing parklands. Before World War II protecting sites from development seemed counterproductive to a state government dominated by extractive industries. By the late 1950s this state that prided itself on being a tourist destination found its lack of state parks to be an embarrassment. *Gateways to the Southwest* is a history of the creation of state parks in Arizona examining the ways in which different types of parks were created in the face of changing social values. Jay Price tells how Arizona's parks emerged from the recreation and tourism boom of the 1950s and 1960s, were shaped by the environmental movement of the 1970s and 1980s, and have been affected by the financial challenges that arose in the 1990s. He also explains how changing political realities led to different methods of creating parks like Catalina, Homolovi Ruins, and Kartchner Caverns. In addition, places that did not become state parks have as much to tell us as those that did. By the time the need for state parks was recognized in Arizona, most choice sites had already been developed, and Price reveals how acquiring land often proved difficult and expensive. State parks were of necessity developed in cooperation with the federal government, other state agencies, community leaders, and private organizations. As a result, parks born from land exchanges, partnerships, conservation easements, and other cooperative ventures are more complicated entities than the state park designation might suggest. Price's study shows that the key issue for parks has not been who owns a place but who manages it, and today Arizona's state parks are a network of lake-based recreation, historic sites, and environmental education areas reflecting issues just as complex as those of the region's better-known national parks. *Gateways to the Southwest* is a case study of resource stewardship in the Intermountain West that offers new insights into environmental history as it illustrates the challenges and opportunities facing public lands all over America.

Arizona Wildlife Views, 2005

Wilderness of Hope Quinn Grover, 2019-09-01 Longtime fly fisherman Quinn Grover had contemplated the why of his fishing identity before more recently becoming focused on the how of it. He realized he was a dedicated fly fisherman in large part because public lands and public waterways in the West made it possible. In *Wilderness of Hope*, Grover recounts his fly fishing experiences with a strong evocation of place, connecting those experiences to the ongoing national debate over public lands. Because so much of America's public lands are in the Intermountain West, this is where arguments about the use and limits of those lands rage the loudest. And those loudest in the debate often become caricatures: rural ranchers who hate the

government West Coast elites who don't know the West outside Vail Colorado and energy and mining companies who extract from once protected areas These caricatures obscure the complexity of those who use public lands and what those lands mean to a wider population Although for Grover fishing is often an escape back to wildness it is also a way to find a home in nature and recalibrate his interactions with other parts of his life as a father son husband and citizen Grover sees fly fishing on public waterways as a vehicle for interacting with nature that allows humans to inhabit nature rather than destroy or preserve it by keeping it entirely separate from human contact These essays reflect on personal fishing experiences with a strong evocation of place and an attempt to understand humans relationship with water and public land in the American West Purchase the audio edition **Selected Water Resources Abstracts** ,1975-04 *Mid Atlantic Fly Fishing Guide* ,2007 *Report* Indiana.
