MIGS Malik Kahook, 2024-06-01 With a revolution in the surgical management of mild to moderate glaucoma new procedures allow for the use of microinvasive techniques that avoid disruption of the conjunctiva and formation of a bleb. These approaches range from laser therapies targeting the outflow system of the eye to the implantation of miniature devices in Schlemm's canal or the suprachoroidal space. The emergence of this new branch of glaucoma surgery often coupled with micro incisional cataract surgery requires the practicing surgeon to learn about anatomical nuances to ensure success. **MIGS Advances in Glaucoma Surgery** will aid the novice resident as well as the seasoned ophthalmic surgeon facing these new issues in glaucoma treatment. The book addresses preoperative patient selection, advice, intraoperative pearls for success, and post-operative management skills, which are some of the important aspects of the process towards the adoption of MIGS. Why you will want to read **MIGS Advances in Glaucoma Surgery**: Forward thinking contributions from seasoned MIGS experts who have intimate knowledge of the devices, benefits, and potential pitfalls in their use. Basic knowledge is provided that will allow each surgeon to tailor their treatment plan while leveling the learning curve. Assists in identifying patients with a milder form of the disease and higher target pressures who may benefit from the MIGS devices. **MIGS Advances in Glaucoma Surgery** is the first book of its kind to cover the range of devices in this arena using expert contributors and offering real world pearls for practice that can be used in the operating room. Practicing cataract and glaucoma physicians, residents, and fellows will benefit from this timely resource as the thought process for how to treat glaucoma has advanced. Epidemiology, staging, and screening, as well as premalignancy, chemoprevention, and the molecular biology of head and neck cancer, lay the groundwork for the understanding of the clinical chapters that follow. Controversial treatments will be compared to the standard management of patient care. Therapy chapters are divided into stage or category specific: resectable, advanced unresectable, advanced or metastatic problems, allowing the reader to review the current standards and options for patient types or specific patients easily. Considerations of supportive care, late toxicities, and quality of life, often overlooked, are reviewed in detail. This is a comprehensive summary of the current state of the art research and treatment.
