McComb,2014-05-20 Computational Methods in Nonlinear Structural and Solid Mechanics covers the proceedings of the Symposium on Computational Methods in Nonlinear Structural and Solid Mechanics The book covers the development of efficient discretization approaches advanced numerical methods improved programming techniques and applications of these developments to nonlinear analysis of structures and solids The chapters of the text are organized into 10 parts according to the issue they tackle The first part deals with nonlinear mathematical theories and formulation aspects while the second part covers computational strategies for nonlinear programs Part 3 deals with time integration and numerical solution of nonlinear algebraic equations while Part 4 discusses material characterization and nonlinear fracture mechanics and Part 5 tackles nonlinear interaction problems The sixth part discusses seismic response and nonlinear analysis of concrete structure and the seventh part tackles nonlinear problems for nuclear reactors Part 8 covers crash dynamics and impact problems while Part 9 deals with nonlinear problems of fibrous composites and advanced nonlinear applications The last part discusses computerized symbolic manipulation and nonlinear analysis software systems The book will be of great interest to numerical analysts computer scientists structural engineers and other professionals concerned with nonlinear structural and solid mechanics **Proceedings of the 1981 Army Numerical Analysis and Computers Conference** ,1981 *Proceedings of the Army Numerical and Computers Analysis Conference* ,1981 *The Effects of Whole-Body Vibration* Heinrich Dupuis,Georg Zerlett,2012-12-06 The observations made by Paracelsus concerning the dose effect relationship of poison are generally just as applicable to health threatening vibration With regard to kind intensity and duration of the vibration the dose is decisive as to whether the consequences are detrimental unmeaningful or tolerable with respect to health This law of

nature determines the tasks and goals of those whose aim is to safeguard health Researchers worldwide have been occupying themselves with this many faceted question for some time how mechanical vibration affects the human organism and at what point damage occurs If prevention in occupational medicine is to succeed it is most important that the gaps in our present knowledge be closed for if technical preventive measures are to be effective and preventive means in occupational medicine successful they must be based on reliable and complete findings Whenever many independent researchers have worked in a given field for a long period a comprehensive intermediate assessment is appropriate to evaluate the level achieved and the direction the research is going In the area of hand arm vibration this evaluation has already been carried out and the response aroused by this particular research report had led to a demand for a comparable evaluation of the research results on whole body vibration This report presents clearly and exhaustively the current status of international knowledge as well as the questions that remain to be answered
