**The International Geography** Hugh Robert Mill, 1906      **Geography and National Identity** David  
Hooson, 1994-10-20 This volume of especially commissioned essays explores the geography of and the role of geography in  
national and proto national identity Place and national identity are bound together Attachment to the one is almost always  
inseparable from the sense of the other Yet as this volume shows the articulated self conscious linking of place and identity is  
by and large a modern phenomenon that took root in nineteenth century Europe The formation of supranational states and  
the much vaunted globalization of culture led many to believe there would be a progressive dilution of national identities and  
a growing agglomeration of places and nations into larger state units Precisely the reverse has taken place This book  
explores the connections between identity and homeland showing how a place may be perceived as archetypal endowed with  
love and celebrated in music and poetry yet be a pretext for violence and war It examines the evolution of ideas about  
identity and their manifestations in a wide variety of settings from the former Soviet Union to the island states of the South
