Le Monde 1944 1994:

Badiou Peter Hallward, 2003 **Beckett and Badiou** Andrew Gibson, 2007-01-11 Beckett and Badiou offers a provocative new reading of Samuel Beckett's work on the basis of a full critical account of the thought of Alain Badiou. Badiou is the most eminent of contemporary French philosophers. His devotion to Beckett's work has been lifelong. Yet for Badiou, philosophy must be integrally affirmative whilst Beckett apparently commits his art to a work of negation. Beckett and Badiou explores the coherences, contradictions and extreme complexities of the intellectual relationship between the two oeuvres. It examines Badiou's philosophy of being, the event, truth and the subject and the importance of mathematics within his system. It considers the major features of his politics, ethics and aesthetics and provides an explanation, interpretation, critique and radical revision of his work on Beckett. It argues that once revised, Badiou's version of Beckett offers an extraordinarily powerful tool for understanding his work. Badiou and Beckett are instances of a vestigial or melancholic modernism that is in the teeth of a contemporary culture that dreams ever more ambitiously of plenitude; they commit themselves to a rigorous concept of limit and intermittency. Truth and value are occasional and rare. It is seldom that the chance event arrives to disturb the inertia of the world. For Badiou, however, it is the event and its consequences alone that matter. Beckett rather insists on the common experience of intermittency as destitution. His art is a series of limit figures, exquisitely subtle and nuanced forms for a world whose state of seemingly rigid paralysis is also always volatile, delicately balanced.

Francothèque: A resource for French studies Gareth Thomas, 2014-02-25 Francothèque seeks to provide a French language resource for undergraduate students of French. Direct access to contemporary French culture and society is offered through carefully selected authentic texts and a comprehensive overview of France and the French is provided under six broad headings: history, multicultural society, media, the arts, science and technology, the Francophone world through press articles, historical documents, photographs, posters, advertisements, statistics, poems and songs. Each section starts with an introduction. The authentic texts are accompanied by vocabulary notes and where appropriate, explanations filling in cultural background. One of the features of the book is the *sujets de réflexion* which provide pre-reading stimulus, thus suggesting a particular context of focus from which to approach many of the contexts.

Ethics Alain Badiou, 2014-06-10 Ethical questions dominate current political and academic agendas. While government think tanks ponder the dilemmas of bioethics, medical ethics and professional ethics, respect for human rights and reverence for the Other have become matters of broad consensus. Alain Badiou, one of the most powerful voices in contemporary French philosophy, explodes the facile assumptions behind this recent ethical turn. He shows how our prevailing ethical principles serve ultimately to reinforce an ideology of the status quo and fail to provide a framework for an effective understanding of the concept of evil. In contrast, Badiou summons up an ethic of truths which is designed both to sustain and inspire a disciplined subjective adherence to a militant cause, be it political or scientific, artistic or romantic, and to discern a finely demarcated zone of application for the concept of evil. He

defends an effectively super human integrity over the respect for merely human rights asserts a partisan universality over the negotiation of merely particular interests and appeals to an immortal value beyond the protection of mortal privileges
