New York (N.Y.)

L O Grade 1november Paper 2013:

The Geneva Papers Christophe Courbage,2016-04-29 In January 1976 Raymond Barre the first President of The Geneva Association and Orio Giarini its first Secretary General founded The Geneva Papers on Risk and Insurance with the main goal of supporting and encouraging research in the economics of risk and insurance At that time research in the field of insurance was still embryonic and insurance was regarded as peripheral social activity When sustained economic growth gained traction the function of insurance gradually emerged as a key contributor to economic development By integrating uncertainty into economic theory and benefiting from the progress of both financial economics and decision theory research developed further in the field of insurance economics and risk management and is now prolific The Geneva Papers on Risk and Insurance undeniably contributed to this evolution and its impact on research in insurance has largely exceeded what its two founding members could have expected This volume is a special collection of papers celebrating 40 Years of The Geneva Papers on Risk and Insurance The collection looks back at the storied history of The Geneva Papers on Risk and Insurance and features papers from some of the esteemed authors who have contributed to the journal in its lifetime This collection of papers highlights just a few of the many themes addressed in the papers published by the journal since it was created Nevertheless the selection exemplifies the richness and variety of topics the field of insurance covers *Annual Review of Comparative and International Education 2020* Alexander W. Wiseman,2021-08-02 The Annual Review of Comparative and International Education covers significant developments in the field of comparative and international education This 2020 edition begins with a collection of discussion essays about comparative education trends and directions written by both professional and scholarly leaders *The Economic Roots of the Umbrella Movement in Hong Kong* Louis Augustin-Jean,Anthea Cheung,2018-02-15 In the autumn of 2014 thousands of people young and educated in their majority occupied the chief business district and seat of the government in Hong Kong The protest known as the Umbrella Movement called for genuine democracy as well as a fairer social and economic system The book aims to provide a dynamic framework to explain why socioeconomic forces converged to produce such a situation Examining increasing inequality rising prices and stagnating incomes it stresses the role of economic and social factors as opposed to the domestic political and constitutional issues often assumed to be the root cause behind the protests It first argues that globalization and the increasing influence of China s economy in Hong Kong has weighted on salaries Second it shows that the oligopolistic nature of the local economy has generated rents which have reinforced inequality The book demonstrates that the younger generation which is still finding its place in society has been particularly affected by these phenomena especially with social mobility at a low point Offering a new approach to studying the Umbrella Movement this book will appeal to students and scholars interested in Hong Kong s political landscape as well Chinese politics more broadly **International Norms and Local Politics in Myanmar** Yukiko Nishikawa,2022-03-07 Nishikawa explores how international norms have been adopted in the local context

in Myanmar to project a certain international image while in fact the authorities are exploiting these norms to protect their own interests In the liberal international world order promoted since the end of the Cold War democracy rule of law and human rights have become key components in state and peace building around the world Many donor governments and international organisations have promoted them in their aid and assistance However the promotion of these international norms is based on a flawed understanding of sovereignty and the world For this reason the enforcement of these international norms in Myanmar not only fails to protect vulnerable people but also in some instances exacerbates the situation thereby generating critical insecurity to the most vulnerable people A vital resource for scholars of Myanmar s politics as well as a valuable case study for International Relations scholars more broadly

Kennedy, 2020-07-28 The book explores the state of social studies education within selected East Asian societies and provides some insights into distinctive classroom practices In an increasingly volatile and unpredictable world the education of young people who both understand the contexts in which they are growing up and see the need for engaging with them is a top priority This task falls to social studies education which carries the responsibility for inducting young people into their social world and helping them to see the role they can play within it This is particularly important in East Asia where strong economic growth long held cultural values and diverse political systems create an environment that challenges young people on multiple fronts This book with its team of regional authors shows how different societies in the region are dealing with these challenges and what can be expected from future citizens The book will appeal to policy makers researchers and teachers interested in the current state of social studies education in East Asian societies
