Murphy, 1997-06-26 John Law 1671 1729 left a remarkable legacy of economic concepts from a time when economic conceptualization was very much at an embryonic stage Yet he is best known and generally dismissed today as a rake duellist and gambler This intellectual biography offers a new approach to Law one that shows him to have been a significant economic theorist with a vision that he attempted to implement as policy in early eighteenth century Europe Law s style marked by a clarity and use of modern terminology stands out starkly against the turgid prose of many of his contemporaries His vision of a monetary and financial system was certainly one of a later age for Law believed in an economy of banknotes and credit where specie had no role to play Ultimately Law failed as a policy maker in part because of the entrenchment of the financiers and their aristocratic backers and in part because of theoretical flaws in his vision His struggle for power took place against the background of Europe s first major stock boom and collapse The collapse of the Mississippi System which he had conceived and the South Sea Bubble led to a lasting impression of Law as a failure It is this impression that Antoin Murphy seeks to dispel      **A handbook to London, in Engl. and Fr., compiled for the use of members of the 7th International congress of hygiene and demography**, 1891      The American College Songster ,1876      *The Canada Gazette* Canada, 1977      **Le Marché Financier** Arthur Raffalovich, 1905      Order and History Eric Voegelin, 2000 Order and History Eric Voegelin s five volume study of how human and divine order are intertwined and manifested in history has been widely acclaimed as one of the great intellectual achievements of our age In the fourth volume The Ecumenic Age Voegelin breaks with the course he originally charted for the series in which human existence in society and the corresponding symbolism of order were to be presented in historical succession The analyses in the three previous volumes

remain valid as far as they go Voegelin explains but the original conception proved untenable because it had not taken proper account of the important lines of meaning in history that did not run along lines of time The Ecumenic Age treats history not as a stream of human beings and their actions in time but as the process of man's participation in a flux of divine presence that has eschatological direction The process of history and such order as can be discerned in it Voegelin writes is not a story to be told from the beginning to its happy or unhappy end it is a mystery in process of revelation In the present volume Voegelin applies his revised conception of historical analysis to the Ecumenic Age a pivotal period that extends roughly from the rise of the Persian Empire to the fall of the Roman The age is marked by the advent of a new type of political unit the ecumenic empire achieved at the cost of unprecedented destruction Yet the pragmatic destructiveness of the age is paralleled by equally unprecedented spiritual creativity born from the need to make sense of existence in the wake of imperial conquest These spiritual outbursts gave rise to the great ecumenic religions and raised fundamental questions for human self understanding that extend into our historical present
