VENTES HYPNOTIQUES EDMOND AMBOS, **COMMENT REDRESSER VOS VENTES ?** EDMOND AMBOS, **TV Lobotomy** Michel Desmurget, 2023-07-04 TV unleashes the imagination and feeds intelligence A child deprived of TV risks social isolation TV dumbs you down TV makes you obese It seems that everything and its opposite has already been said about TV But what is it really How can we distinguish between the radical No TV of some and the supposedly entertaining virtues touted by others Michel Desmurget a doctor in neuroscience has sifted through and synthesized thousands of research articles published over the last fifty years in the most rigorous international journals The conclusion is unequivocal

we must stop watching television for good whatever the program All content even that meant to teach can never come close to any other learning method The data is clear television viewing is detrimental to school performance For a child in elementary school for example every hour spent daily watching television increases the likelihood that he or she will one day leave the school system without any qualifications For specialists there is no doubt that television has a negative influence not only on intellectual development but also on behavior Thus certain eating disorders anorexia bulimia are related to a frantic consumption of television programs In short watching television has an impact on our life expectancy However the harmful impact of this risk is largely underestimated because of the large sector of the public exposed to television more than 85% of Western households have at least one television set and because of a debate on the subject that has become inaudible and confused Moreover the results of the research initiated by the big media groups on the subject remain proprietary i e closed to the general public Believing that we are facing a real public health problem Michel Desmurget wants to act as a responsible scientist with a clear concise and rigorously referenced book the message cannot go unnoticed Michel Desmurget is a doctor of neuropsychology He attended several major American universities MIT Emory UCSF and is now a research director at INSERM in cognitive neuroscience He is particularly interested in the problems of brain organization and plasticity He is the author of the book *TV Lobotomy* Max Milo 2022 which is based in part on his personal history Exasperated by having to constantly justify the choice not to have television at home and to prevent his children from having access to it and not to be seen as a sociopath in the eyes of those around him he has done a massive job to argue his point

Patrimoine et devoir d'oubli Dominique Audrerie, 2010 **Narrations d'un nouveau siècle** Bruno Blanckeman, Barbara Jane Havercroft, 2012

En août 2011 s'est tenue à Cerisy-la-Salle une double manifestation : les « Narrations d'un nouveau siècle romans et récits français 2001-2010 » dont ce livre constitue les actes, et le colloque « Une littérature qui accorde la part belle au roman mais sans exclusive géographique dans la concurrence des récits empruntant tous les genres et de multiples arts ». Une littérature française parce qu'elle est en langue française mais travaillée de l'intérieur et renvoyée à sa propre tranche par les évolutions de cette langue et les porosités multiculturelles que suscitent aujourd'hui des changements mondialisés. L'ouvrage rassemble les points de vue d'universitaires européens, canadiens et américains. Il se veut un observatoire critique des évolutions en cours de la littérature et un laboratoire théorique ouvert à différentes approches permettant d'en mesurer les enjeux en temps réel.
