specialized education of Pilates instructors by enabling them to learn a safe and systematic method of instructing those with scoliosis. This framework helps instructors administer individualized Pilates exercise progressions. These comprise creating a client profile for the individual, developing concepts and considerations for effective exercise delivery and execution, and presentation of those exercise progressions. In addition, two important aspects not yet found within the Pilates field are addressed. The first is the importance of the significant role outlining the scope of practice of the Pilates instructor in the care of those with spinal asymmetries. And secondly is to identify separate approaches necessary for differing populations at distinct times of life. Stages such as youth and adult each require a certain approach. The decades of young adult, mid life, and elder years present special challenges due to the co-morbidities associated with the adult with scoliosis. **The Complete**
