Manual on Membrane Lipids Rajendra Prasad, 2013-11-11 Although previously thought to be merely passive structural components membrane lipids have recently been found to be actively involved in cellular transport and signal transduction processes Clear protocols for the study of membrane lipid properties cellular transport or signal transduction are presented in this manual Following a short introduction to membrane lipids techniques for the isolation and extraction of membrane fractions the analysis of the lipid composition lipid turnover and the involvement in signal transduction as well as the preparation of liposomes are described

Immunology Methods Manual: Expression of recombinant proteins Ivan Lefkovits, 1997

Manual of Industrial Microbiology and Biotechnology Arnold L. Demain, Nadine A. Solomon, 1986 This volume is the culmination of the need for a reference that pulls together the biological and engineering methodologies required to develop a successful industrial process from culture isolation and development to useful product The structure of the manual resembles the sequence of operations involved in development of commercial biological processes and products

Manual of Procedures for the Seminar on Laboratory Diagnosis and Monitoring of Cancer, 1982

Bacteriological Analytical Manual United States. Food and Drug Administration. Division of Microbiology, 1984 Phage Display of Peptides and Proteins Brian K. Kay, Jill Winter, John McCafferty, 1996-10-23 Both novices and experts will benefit from this insightful step by step discussion of phage display protocols Phage Display of Peptides and Proteins A Laboratory Manual reviews the literature and outlines the strategies for maximizing the successful application of phage display technology to one's research It contains the most up to date protocols for preparing peptide affinity reagents monoclonal antibodies and evolved proteins Prepared by experts in the field Provides proven laboratory protocols troubleshooting and tips Includes maps sequences and sample data Contains extensive and up to date references

Physiological function of the cellular prion protein (PrPc_1hnc) Sanja Ramljak, 2008-11-15 The physiological role of the cellular prion protein PrPc is still not fully understood This study gives a further insight into the possible physiological functions of PrPc via recognizing proteome changes influenced by different levels of PrPc expression in human embryonic kidney HEK 293 and PrPc deficient Prnp0/0 cell line The two cell lines gave largely non intersecting results A high proportion of proteins deregulated following PrPc overexpression in HEK 293 cells is involved in energy metabolism and cellular homeostasis Hence the previously reported increased sensitivity of PrPc overexpressing cells to apoptotic stimuli might be caused by perturbed expression of proteins essential for energy production and maintenance of cellular homeostasis A particularly significant point of the present study is PrPc overexpression induced regulation of several proteins which are known to contribute to Alzheimer and Parkinson disease pathogenesis This finding may be helpful in understanding the common molecular mechanisms underlying the pathogenesis of prion diseases and other neurodegenerative disorders Conversely the introduction of the human prion protein gene PRNP into Prnp0/0 cells correlated positively with regulation of proteins mainly implied in protection against

oxidative stress and apoptosis This finding is in line with earlier reports demonstrating rescue of Prnp0/0 neurons from apoptosis following an introduction of prion protein gene Altogether the presence absence and the level of PrPc expression seem to be crucial for the fluctuation between PrPc's pro and anti apoptotic properties In addition this study provides first time evidence for PrPc induced up regulation of the glycolytic enzyme lactate dehydrogenase LDH after transient focal cerebral ischemia in wild type mice as compared to Prnp0/0 mice The possibility that LDH and its product lactate known to protect neural tissue against hypoxia ischemia might be involved in previously described PrPc mediated neuroprotection against ischemic injury is considered

Basic Protocols in Encapsulation of Food Ingredients Andrea

Gomez-Zavaglia,2024-11-15 This second volume details circular economy innovative materials and techniques and Omics techniques to understand the mechanisms and pathways explaining the encapsulation and delivery of the defined nuclei Chapters will provide sufficient guidance into encapsulation techniques and into the basic understanding of what is needed in terms of tools materials and supplies to implement innovative approaches in Food Science and Technology Written in the format of the Methods and Protocols in Food Science MeFS series the chapters include an introduction to the respective topic list necessary materials and reagents detail well established and validated methods for readily reproducible laboratory protocols and contain notes on how to avoid or solve typical problems Authoritative and cutting edge Basic Protocols in Encapsulation of Food Ingredients Second Edition aims to provide well established protocols and procedures largely used by both academics and industrials

Enzymes, Receptors, and Carriers of Biological Membranes A. Azzi,U. Brodbeck,P.

Zahler,2012-12-06 This manual follows at a distance of 3 years the previous one entitled Membrane Proteins and like its predecessor it is the result of an International Advanced Course sponsored by FEBS SKMB and SNG which was held in Bern in September 1983 The experiments offered to the students in the course had to be largely up dated or chosen from new areas of membrane research because of the substantial and rapid development of the field Using the protocols of the course the participants graduate students postdoctoral fellows and also senior scientists in most cases not at all expert in biomembrane research were able to repeat all the experiments successfully Those few protocols which for some reason did not fulfill the role we expected were modified These protocols have now been collected in this manual which we are able to offer to a number of biology biochemistry and biophysics laboratories hoping that the selected number of methods which have been successfully used during the Advanced Course may be useful to them This manual is also intended for teachers of practical classes who may use it as a text book and as source of selected references collected not in the library but in the laboratory from the notebooks of the young researchers who have contributed so much to the success of the Course
