SAFETY CONSIDERATIONS

Installing and servicing heating equipment can be hazardous due to gas and electrical components. Only trained and qualified personnel should install, repair, or service heating equipment.

Untrained personnel can perform basic maintenance functions such as cleaning and replacing air filters. All other operations must be performed by trained service personnel. When working on heating equipment, observe precautions in the literature, on tags, and on labels attached to or shipped with the unit and other safety precautions that may apply.

Follow all safety codes. In the United States, follow all safety codes including the National Fuel Gas Code (NFPA 54/NFPA 54-1999/ANSI Z223.1-1999 NFPA 54B), In Canada, refer to the CAN/CSA-B149.1- and 2-NFPA National Standard of Canada, National Gas and Propane Installation Codes (NSC60/61). Wear safety glasses and work gloves. Have fire extinguisher available during startup and adjustment procedures and service calls.

Read safety instructions. This is the safety data symbol (S). When you see this symbol on the furnace and its instructions or manuals, be alert for the potential for personal injury.

Understand the signal words DANGER, WARNING, CAUTION, and NOTE. These words are used with the safety data symbol. DANGER identifies the most serious hazards which will result in severe personal injury or death. WARNING identifies a hazard which could result in personal injury or death. CAUTION is used to identify unsafe practices which could result in either personal injury or product and property damage. NOTE is used to highlight suggestions which will result in enhanced installation, reliability, or operation.
