Pure Lands in Asian Texts and Contexts Georgios T. Halkias,Richard K. Payne,2019-03-31 This diverse anthology of original Buddhist texts in translation provides a historical and conceptual framework that will transform contemporary scholarship on Pure Land Buddhism and instigate its recognition as an essential field of Buddhist studies Traditional and contemporary primary sources carefully selected from Buddhist cultures across historical geopolitical and literary boundaries are organized by genre rather than chronologically geographically or by religious lineage a novel juxtaposition that reveals their wider importance in fresh contexts Together these fundamental texts from different Asian traditions expertly translated by eminent and up and coming scholars illustrate that the Buddhism of pure lands is not just an East Asian cult or a marginal type of Buddhism but a pan Asian and deeply entrenched religious phenomenon The volume is organized into six parts Ritual Practices Contemplative Visualizations Doctrinal Expositions Life Writing and Poetry Ethical and Aesthetic Explications and

Worlds beyond Sukh vat Each part is introduced and summarized and each translated piece is prefaced by its translator to supply historical and sectarian context as well as insight into the significance of the work Common and less common issues of practice doctrine and intra religious transfer are explored and deeper understandings of the meaning of pure lands are gained through the study of the celestial cosmological internal and earthly pure lands associated with various buddhas bodhisattvas and devotional figures The introduction by the volume editors ties the diverse themes of the book together and provides a historical background to Pure Land Buddhist studies Scholars of Buddhism and Asian religion including graduate and post graduate students as well as Buddhist practitioners will appreciate the range of translated materials and accompanied discussions made accessible in one essential collection the first of its kind to center on the formerly neglected topic of Buddhist pure lands

Joint FAO-IOC-IAEA technical guidance for the implementation of early warning systems for harmful algal blooms Food and Agriculture Organization of the United Nations, United Nations Educational, Scientific and Cultural Organization-IOC, International Atomic Energy Agency, 2023-03-16 Globally there are 3 400 to 4 000 described species of marine microalgae but only 1 to 2 percent are considered to be harmful Harmful algal blooms HABs have significant impacts on food safety and security through contamination or mass mortalities of aquatic organisms The impacts and mass mortalities of marine species caused by harmful algae are not new and have been recorded for decades However there is growing concern that these events will increase due to accelerating global warming climate change and anthropogenic activities Indeed if not properly controlled aquatic products contaminated with HAB biotoxins are responsible for potentially deadly foodborne diseases and when rapidly growing HAB consequences include reduced dissolved oxygen in the ocean dead zones and mass mortalities of aquatic organisms Improving HAB forecasting is an opportunity to develop early warning systems for HAB events such as food contamination mass mortalities or foodborne diseases Surveillance systems have been developed to monitor HABs in many countries however the lead time or the type of data i e identification at the species level determination of toxicity may not be sufficient to take effective action for food safety management measures or other reasons such as transfer of aquaculture products to other areas Having early warning systems could help mitigate the impact of HABs and reduce the occurrence of HAB events The Joint FAO IOC IAEA technical guidance for the implementation of early warning systems EWS for HABs will guide competent authorities and relevant institutions involved in consumer protection or environmental monitoring to implement early warning systems for HABs present in their areas marine and brackish waters specifically those affecting food safety or food security benthic HABs fish killing HABs pelagic toxic HABs and cyanobacteria HABs The guidance provides a roadmap for stakeholders on how to improve or implement an EWS for HABs and biotoxins where appropriate It is important to note that not all countries and institutions can implement the same level of EWS for HABs and this guidance is intended mainly for those who seek to broaden existing early warning systems or who are just beginning to consider putting a system in place
