

Question 4 Model

- Both texts 2 and 3 use strong, vivid language but for different effects. In text 3, strong language is used throughout the piece. For example, when the pair are approaching the valley, it states that 'Panic entered the hearts of both of them'. This strong language helps the reader imagine their emotions more strongly. It shows that they were absolutely terrified, emphasised by the strong noun 'panic', and this means that the reader is more likely to empathise with the characters and be gripped by the story.
- Text 2 also uses strong language, in the final paragraph. An example is where it mentions the families' fear that a 'media onslaught' will 'overwhelm' the men when they 'escape from their underground dungeon'. As with text 3, this shows fear, but this time from the families of those involved, rather than the individuals themselves. Using the metaphor 'underground dungeon' to describe their location is striking. It carries associations of punishment and suffering, even though the miners have done nothing wrong. As a result, the readers empathise strongly with the miners and their families, and feeling glad that they are likely to escape.

Metaphor Translation in Popular Science Sui He,2024-12-30 This book explores the intersection of metaphor studies and translation studies specifically focusing on popular scientific articles The volume complements existing

work on conceptual metaphor theory in translation by aligning it with conceptual blending theory to demonstrate how an integrated approach offers a more expansive understanding of the cognitive and linguistic dimensions of metaphor translation. It includes an essential introduction to the key concepts and theories in metaphor studies and metaphor translation research, discerning the importance of localising theories from neighbouring disciplines such as metaphor studies for advancing interdisciplinary research in translation studies. Sui He applies this approach to popular cosmological discourse, analysing examples from articles in *Scientific American* and their Chinese translations, allowing for a nuanced examination of translation strategies adopted by translators at both cognitive and linguistic levels, which presents the circulation and transformation of popular cosmological knowledge from English in two Chinese mediated communities. This book will be of interest to students and scholars in translation studies, metaphor studies and discourse analysis.

Dickinson, Jo Westbrook, 2004-03-22 I could not help but admire the breadth and scope of this text. This is a book I would recommend to all, no matter what route they take to train as a teacher of English. It is aimed at secondary teachers but would be equally useful for those preparing to teach in further education. Not only does it provide concise and balanced accounts of key pedagogic issues, it also includes a range of interesting and engaging lesson suggestions. This book does cover a lot of ground with excellent chapters on planning, assessment, teaching reading and teaching poetry. This is a text that should accompany every student teacher of English and find its way on to the shelf of all practising teachers. This book excited me. It is written in a style that makes you want to try out activities and take up challenges. Donna Bryant, Deputy Head, Camborne School and Community College, Cornwall. The activities were both challenging and rewarding. These would be useful and would promote self-reflection and the notions of personal progression and goal setting for the student.
