Insight and Intuition - Two Sides of the Same Coin? Michael Öllinger, Kirsten G. Volz, Eörs Szathmáry, 2018-07-12

Insight and intuition might be the most mysterious and fascinating fields of human thinking and problem solving. They are different from standard and analytical problem solving accounts and provide the basis for creative and innovative thinking. Until now they were investigated in separate academic fields with differing traditions. Therefore this eBook attempts to bridge the gap between both processes and to provide a more integrated perspective. Several experts address the underlying cognitive processes and provide a broad spectrum of new empirical, theoretical and methodological insights.

Universities as Engines of Economic Development Edward Crawley, John Hegarty, Kristina Edström, Juan Cristobal Garcia Sanchez, 2020-06-22

This book describes patterns of behavior that collectively allow universities to exchange knowledge more effectively with industry, accelerate innovation and eventually contribute to economic development. These are based on the effective practices of leading and ambitious universities around the world that the authors have benchmarked and the personal experiences of the authors in a number of international institution building projects including those of MIT. The authors provide guidance that is globally applicable but must be locally adapted. The approach is first to describe the context in which universities act as engines of economic development and then present a set of effective practices in four domains: education, research, innovation and supporting practices. Each of these domains has three to six practices and each practice is presented in a similar template with an abstract, a rationale and description, key actions and one or two mini case studies. The practices are summarized by integrative case studies. The book focuses on a globally

adaptable set of effective practices complemented by case studies that can enhance universities contribution to economic development based on an integrated view of education research and innovation Presents effective practices and broader insights that come from real global experience spelled out in templates and explained by cases Includes tangible resources for university leaders policy makers and funders on how to proceed **Sport, Ethics and Philosophy** Mike

McNamee,2018-10-19 This book represents a bold statement concerning the excitement and energy of the field of sports ethics and philosophy in contemporary terms It is comprised of a collection of commissioned essays from the leading international scholars in the field to celebrate the ten year editorship of Mike McNamee for the journal Sport Ethics and Philosophy The collection includes essays familiar sport philosophers on work about the nature and nuances of sports and games playing winning and losing role models and strategic fouling It also celebrates in phenomenological terms the complex and heterogeneous experience and values of sports in both phenomenological and analytic modes Finally it addresses the most serious threats to sport integrity and governance in the shape of doping and the unchecked power of sports institutions and the charisma of sport that is at the mercy of commercialism This book was originally published as a special issue of Sport Ethics and Philosophy **Advanced Introduction to Social Innovation** Frank Moulaert,Diana MacCallum,2019 Social

innovation SI has in the last decade or so become an important idea and concept in policy practice and scholarship surrounding human development It is often seen as an antidote to narrowly defined technological and market oriented modes of innovation Its historical significance and development tied to centuries of struggles for social change remain under appreciated and unacknowledged This Advanced Introduction explores the historical and contemporary meanings of social innovation and its relationship with political and social movements It develops an understanding of SI as a form of ethical practice for meeting needs transforming social relations and collectively empowering communities to shape the future Additionally it proposes that ethical research should aim to be socially innovative in this sense and provides concrete suggestions of how this concern can be embodied in action research and community development methodologies

Madness and Creativity: Yes, No or Maybe? Anna Abraham,2015-11-23 The pervasive idea that madness and creativity are intricately linked is one that holds tremendous fascination for both scientists and the general public alike Although this view was at first largely driven by anecdotal evidence showcasing the manifestation of mental illness in individuals who exhibited extraordinary levels of creativity in various spheres of life it initiated a strong impetus to empirically investigate the association between mental health and creativity A variety of approaches and combinations of approaches have been adopted to address this association including clinical personality psychometric behavioral cognitive historiometric and neuroscientific Despite the ever accumulating body of evidence over the past six decades investigating this link what is lacking is a comprehensive overview of the disparate findings from these different approaches that will enable us to address the question of whether there is an empirically founded relationship between creativity and mental

illness And if such a link does exist what is the nature of this association The purpose of this Research Topic was to motivate theorists and researchers to answer this question or at least attempt to do so given the available evidence thus far The themes of interest that were open to exploration in view of this topic included a Which mental disorders are positively associated with creativity b Which mental disorders are negatively associated with creativity c The dynamics of information processing biases positive versus negative associated with psychiatric and high risk populations d Theories regarding the madness creativity link e Personality based studies on creativity f Creativity mental illness and the brain g Genes and creativity h How can studies on neurological populations inform this debate i What are the areas of impact with regard to real world applications and practice j Historical timeline of this question k Evolutionary perspectives on the madness creativity link l Methodological problems associated with this field m Philosophical issues to bear in mind when investigating this domain n The usefulness of the troubled genius concept The invitation to contribute was open to all interested academics regardless of whether they were seasoned explorers within this field of study or just beginning to get their feet wet in its murky waters As a result of adopting this inclusive approach the contributions showcase a wide variety of perspectives from academic departments and institutions the world over What is most encouraging is that so many were willing to openly take on the challenge of tackling this difficult question head on We hope future discussions that follow through as a result of this collective effort will prove to be just as fruitful
