education applied linguistics and educational sciences are presenting their current research in the area of primary EFL teacher education. The starting point of this collection was the general shift in educational research towards the role of teachers as well as towards facets of the teaching profession and their relative contributions to successful and good education. All contributions to this volume focus primarily on hitherto insufficiently researched aspects of the professional development of primary EFL teachers. This book is thus contributing to closing existing research gaps as well as giving impetus for future studies and increasing communication about research on the professional development of EFL teachers in related disciplines. Aside from an overview of teaching primary EFL in Europe and beyond the contributors are presenting up to date research on policy and practice of primary EFL teacher education in service training as well as professional competences and beliefs of primary EFL teachers. Edited by Eva Wilden and Raphaela Porsch this interdisciplinary book provides contributions from Nora Benitt, Henriette Dausend, Ann Cathrin Deters, Philipp Janet, Enever Alicia, Jckel, Johannes König, Angelika Kubanek, Sandra Lammerding, Rama Mathew, Gnter Nold, Annamaria Pinter, Thorsten Piske, Shelagh Rixon, Andreas Rohde, Henning Rossa, Bianca Roters, Sarah Strau and Sarantis Tachtsoglou. **Shark Research** Jeffrey C Carrier, Michael R. Heithaus, Colin A. Simpfendorfer, 2018-09-03. Over the last decade the study of shark biology has benefited from the development, refinement and rapid expansion of novel techniques and advances in technology. These have given new insight into the fields of shark genetics, feeding, foraging, bioenergetics, imaging, age and growth, movement, migration, habitat preference and habitat use. This pioneering book, written by experts in shark biology, examines technologies such as autonomous vehicle tracking, underwater video, approaches, molecular genetics, techniques and accelerometry among many others. Each detailed chapter offers new insights and promises for future studies of elasmobranch biology, provides an overview of appropriate uses of each technique and can be readily extended to other aquatic fish and marine mammals and reptiles. Including chapter authors who were pioneers in developing some of the technologies discussed in the book, this book serves as the first single source reference with in-depth coverage of techniques appropriate for the laboratory and field study of sharks, skates and rays. It concludes with a unique section on Citizen Science and its application to studies of shark biology. This is a must read for any marine biologist or scientist working in the field of shark biology as well as marine biology students and graduates. **Systems Neuroscience in Depression** Thomas Frodl, 2016-03-16.
