Coolidge, Thomas Wynn, 2009-06-22 Cognitive Archaeology and Human Evolution presented new directions in the study of cognitive archaeology Seeking to understand the conditions that led to the development of a variety of cognitive processes during evolution it uses evidence from empirical studies and offers theoretical speculations about the evolution of modern thinking as well The twelve essays written by an international team of scholars represent an eclectic array of interests methods and theories about evolutionary cognitive archaeology Collectively they consider whether the processes in the development of human cognition simply made a better use of anatomical and cerebral structures already in place at the beginning of hominization They also consider the possibility of an active role of hominoids in their own development and query the impact of hominoid activity in the emergence of new cognitive abilities *The Material Subject*

Urmila Mohan, Laurence Douny, 2020-11-01 The Material Subject emphasises how bodily and material cultures combine to make and transform subjects dynamically The book is based on the French *Matire Penser MaP* school of thought which draws upon the ideas of Mauss Schlder Foucault and Bourdieu among others to enhance the anthropological study of embodiment practices techniques materiality and power Through theoretical sophistication and empirical field research case studies from Europe Africa and Asia bring MaP's ideas into dialogue with other strands of material culture studies in the English speaking world These studies mediate different scales of engagement through a sensori motor affective and cognitive focus on practices of making and doing Examples range from the precarity of professional divers in French public works to
