The Chemical News and Journal of Physical Science ,1903 **Chemical News and Journal of Physical Science** ,1899 **Chemical News and Journal of Industrial Science** ,1903 **Routledge Library Editions: Plato** Various,2021-12-02 Plato is perhaps the best known and most widely studied of all the ancient Greek philosophers A pupil of Socrates and teacher of Aristotle his ideas have inspired and influenced scholars of nearly every era His famous series of dialogues have become a standard part of the western philosophical canon from the Euthyphro and Gorgias of his early period the Republic Phaedrus and Symposium of his middle period to the Theaetetus and Laws of his late period The Routledge Library Edition makes available in a single set an outstanding range of scholarship devoted to Plato s philosophical work Routledge Library Editions Plato makes available in a single set an outstanding range of scholarship devoted to Plato s philosophical work The 21 volumes provide detailed analysis of his writings and philosophical ideas From the classic works of Francis Cornford G C Field and A E Taylor to more recent approaches and interpretations this set provides libraries and scholars with a century of outstanding scholarship on this key philosopher *Plato's Philebus (RLE: Plato)* Donald Davidson,2012-11-27 The Philebus is hard to reconcile with standard interpretations of Plato s philosophy and in this pioneering work Donald Davidson seeks to take the Philebus at face value and to reassess Plato s late philosophy in the light of the results The author maintains that the approach to ethics in the Philebus represents a considerable return to the methodology of the earlier dialogues He emphasizes Plato s reversion to the Socratic elenchus and connects it with the startling reappearance of Socrates as the leading voice in the Philebus **Time and Cosmology in Plato and the Platonic Tradition** ,2022-02-14 The way Plato discusses time and its relation to the cosmos has puzzled and divided his readers from the very beginning This originated rich and diverse readings that shaped and contributed to the cosmological discussion of the Hellenistic and Late Antiquity periods Modern scholars too have offered many and often opposed views on the matter This book assembles an international team of scholars to move forward the study of Plato s conception of time to find fresh insights for interpreting his cosmology and to reimagine the ancient Platonic tradition **Chemical Abstracts** ,1908 Bulletin United States. metaphysics starting with the principle that all that exists proceeds from a single cause proceeding to critique the Proclean triadic view of procession and reversion and severely undermining the status of intellectual reversion in establishing being as the intelligible object Damascius investigates the internal contradictions lurking within the theory of descent as a whole showing that similarity of cause and effect is vitiated in the case of processions where one order e g intellect gives rise to an entirely different order e g soul Neoplatonism as a speculative metaphysics posits the One as the exotic or extopic explanans for plurality conceived as immediate present to hand and therefore requiring explanation Damascius shifts the perspective of his metaphysics he struggles to create a metaphysical discourse that accommodates insofar as language is sufficient the ultimate principle of reality After all how coherent is a metaphysical system that bases itself on the Ineffable as a first principle Instead of creating an objective ontology Damascius writes ever mindful of the limitations of dialectic and of the pitfalls and snares inherent in the very structure of metaphysical discourse *Journal - Chemical Society, London* Chemical Society (Great Britain),1900 **Journal of the Chemical Society** Chemical Society (Great Britain),1900 Titles of chemical papers in British and foreign journals included in Quarterly journal v 1 12 *Journal of the Chemical Society* ,1910 *The Guardians in Action* William H.
